

2019-09-17 - VIVO Development IG

Date

17-September-2019

Call-in Information

Time: 11:00 am, Eastern Daylight Time (New York, GMT-04:00)

To join the online meeting:

- Go to: <https://lyrasis.zoom.us/my/vivo1>
- One tap mobile:
 - US: +16699006833,,9358074182# or +19292056099,,9358074182#
- Or Telephone:
 - US: +1 669 900 6833 or +1 929 205 6099 or 877 853 5257
 - Meeting ID: 935 807 4182
- International numbers available: <https://zoom.us/j/aeANHanzED>

Slack

- <https://vivo-project.slack.com>
 - Self-register at: <http://bit.ly/vivo-slack>

Attendees

[blocked URL](#) Indicating note-taker

1. [Ralph O'Flinn](#)
2. [Brian Lowe](#)
3. [Huda Khan](#) ★
4. [Steven McCauley](#)
5. [Andrew Woods](#)
6. [María Amalía Flórez Huertas](#)
7. [Benjamin Gross](#)
8. [Mike Conlon](#)
9. [Don Elsborg](#)

Agenda

1. Community updates
2. Topics for future development meetings
 - a. SDB vs TDB
 - b. Editing
 - c. Internationalization (update, repositories, work processes, connecting the groups)
 - d. VIVO Scholar (update, repositories, vision for connection to existing VIVO's, connecting the groups)
 - e. Ontology (update, future tooling, connecting the groups occasionally)
 - f. Externalizing triplestore
 - g. Moving English out of core
 - h. Java 11
 - i. [508 compliance](#)
3. VIVO 1.11.0 [release candidate](#) planning
 - a. [Release Testing - 1.11.0](#)
 - b. Issues

i. type key summary assignee reporter priority status resolution created updated dt

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

4. In-review tickets

a. type key summary assignee reporter priority status resolution created updated due

Notes

Draft notes in Google-Doc

- Next year's VIVO conference: still under discussion. Miami Vice theme? (I made the theme up) but maybe Miami.
- Andrew: What'd I miss?
 - Ralph: Talked about release testing for 1.11. This one time we had a pretty intense discussion. Trying to get people to start testing.
- Conference updates?
 - Andrew: In context of modularization, people would like to be able to download and install VIVO (simple set of commands). Reasonable to have products like database to be installed separately.
 - Anastasia Dimou. RML mapper. Don had heard of R2ML before.
 - Mike: seems to have the same idea as VIVO pump. Take rectangular data/JSON, have an external mapping definition, and produce RDF.
 - Would be interesting to see how to use RML mapper within VIVO. Can we create VIVO mapper starting from spreadsheets.
 - Andrew: VIVO plays two different roles in CRIS environment. Many use VIVO in CRIS as a display where a centralized CRIS system exports data. The other scenario, such as is the case with TIB, is where VIVO is used as the CRIS system. For smaller institutions, VIVO fits their CRIS requirements quite well. For the VIVO as display only use case, the lynchpin seemed to be the mapping between CERIF and VIVO. Openness in helping move that forward.
 - Ralph: pitching Brown as flip to Scholars
 - Steve: hope there is synergy as well. Brown is a smaller institution and prior to VIVO, didn't have research management tool. Had the editing interface for a while. At conference, presented overhaul of editing system.
 - Sources for publication harvesting: PubMed, WoS, CrossRef
 - Django application communicating with VIVO installation by insinuating into form submission process. New UI will take advantage of SPARQL update and query APIs. Hoping to build something modular. Uses Brown's authentication system so faculty and affiliate faculty can login so can edit info there. Includes simple forms for text areas as well as publication harvester and approval process for faculty.
 - Initial roll out had included editing but changed over to display only. Reason for editing interface due to issues with VIVO's native editing interface.
 - Have Rails front end but have a web service that sits between Rails and VIVO that does processing
 - Photo's of Steve and Hector
 - <https://photos.app.goo.gl/Jq1WLaX2MsN8v7zYA>
 - <https://photos.app.goo.gl/2AbTFgtU4x7SfF8M9>
 - Steve: Present people with autocomplete and try to create data within system.
 - RDF actually helpful in this case because can handle bad data in back-end and disguise that from users.
 - Important that we have support for smaller institutions as well and editing will be important for those users.
 - Mike: Editing still important when VIVO plays the CRIS role. Steve, thoughts?
 - Andrew: Brown University has put together an editing UI for VIVO. Potentially analogous to Scholars work with editing UI.
