

2019-10-22 DuraCloud Contributor Call

Call Details

- Time: 4:00pm Eastern Time ([find your time here](#))
- Join Zoom meeting: <https://lyrasis.zoom.us/j/164234988>
- ★ - Indicates who will be taking minutes

Attendees

- [Bill Branan](#) ★
- [Heather Greer Klein](#) (out)
- [Nicholas Woodward](#)
- [Courtney C. Mumma](#)
- [Danny Bernstein](#)
- [Andy Foster](#)

Agenda

(If you have an agenda suggestion/addition, please leave a comment!)

- [Release 6.1.0 prep - testing phase](#)
- Updates - status and activity
 1. LYRISIS
 2. TDL
 3. CANARIE grant
- Operations notes, issues, concerns
- Updates from or planning for relevant conferences/events
 - One to Many grant
 - DigiPres
- Development activity, PRs and reviews

Resources

JIRA

- [Backlog](#)
- [Priority issues list](#)

DuraCloud documentation

1. [User documentation \(wiki\)](#)
2. [Deployment documentation \(github\)](#)

Minutes

Release testing

- Nick started deployment and testing yesterday
- Issue that Danny noted about the scroll bars
- The OpenStack provider is being considered experimental at this point
- Nick planning to test the other tickets (SyncTool and storage stats), should be done with testing by tomorrow (Wed)
- Bill would like to do a release this week if possible
- Danny in the middle of testing the SyncTool parts, just wrapping that up now
- Andy can provide OpenStack end-point credentials for testing
- Scroll bars issue - we landed on just letting scroll bars happen

Updates

- LYRISIS
 - Bill at DigiPres and working on OTM
 - Danny working on release testing
- TDL
 - Nick's been doing testing, looking to upgrade as soon as release is ready. Some internal things that were waiting on this release
 - Working to get funding for Bill to attend the private data grant
 - TDL is doing a planning grant to look at private and sensitive data, looking at service models and the agreements that would need to be in place
 - Meeting of the DPS Collaborative happened at DigiPres

- CANARIE
 - Mill still has work to be done, to get things writing to Rabbit MQ (it can read from the queue, but writing to the queue isn't happening yet)
 - Good traction on WestVault - working with LOCKSS v2.0, which has a push function (should be done in the next couple weeks)
 - May not require the bridge if the push model is a better fit
 - Standing up test instances using OpenStack Train (doesn't actually work with base Stein, they were using a patched version)
 - Also looking at MinIO object storage (<https://min.io/>), docker-based, instance per tenant (as an alternative to Swift) - experiments to be done to determine which is most S3 compatible

Operations

- There are a few PRs open that updates the RTS to handle DSpace 6 and 7 (opened by Michael S)
 - The next several months, expecting more folks wanting to use the RTS
- Things may come up after release

Events

One to Many

- Bill and Sibyl (from UCSD) presented on the status of the grant at DigiPres: https://docs.google.com/presentation/d/1dCMcZRMJKYYVbU_TbtYy1lbMxvKH4pWCGHwnfKEpeZc/edit?usp=sharing

DigiPres (Digital Preservation 2019)

- Worth looking at the new Levels of Preservation
- Bill presented on how tools could be built in AWS for preservation functions: https://docs.google.com/presentation/d/1uF5_L2pPSRuXGMT0iT-fZv53yTA78JnWbv6fMbi4f-A/edit?usp=sharing

Private and Sensitive data grant

- Meeting in Dec in Austin

Actions
