VIVO Scholar Task Force Objectives and Members

Task force objectives

- The VIVO Scholar Task Force consists of members from three or more institutions, but the majority come from Duke University and Texas A&M University.
  - Most of the members will have been involved with the Product Evolution Task Force in some way.
  - We aim to keep the development team small, with 8 members or fewer if possible, and to include developers with applicable skills.
  - Some developers may contribute for specific tasks or for specific sprints.
- The task force will operate with continuous, three-week sprints. Work will be deliverable-based rather than exploratory.
- Weekly meetings will be closed to keep discussions focused but videos of the meetings are shared.
- We intend to streamline development processes and meetings as much as we can.
- We'll create demos at milestone points to share with the community and get feedback.

Facilitators

@Damaris Murry, Duke University

@Richard Outten, Duke University

@Julia Trimmer, Duke University

Members

Paul Albert, Weill Cornell Medicine

Don Elsborg, CU Boulder

Hans Harlacher , Duke University

 Robert Nelson, Duke University

Ralph O'Flinn, University of Alabama at Birmingham

Harry Thakkar, Duke University

Alex Viggio, CU Boulder

William Welling, Texas A&M

Jim Wood , Duke University
