

2020-01-10 Cornell LD4P2 Meeting notes

Date: 10 Jan 2020

Attendees: Steven, Huda, Tim, Simeon, John

Regrets: Lynette, Jason

Agenda & Notes

Review actions from 2019-12-20 Cornell LD4P2 Meeting notes

- **Huda Khan** to discuss with Astrid and David possible collaboration with U Chicago over usability (and maybe others in DOG team)
 - Notes: https://docs.google.com/document/d/1_V7JfAKqSn63-G0zupLZigt8o7R3v_WXC7hWlt8w744/edit
 - 2020-01-10 Chicago report will be discussed in DAG meeting on Jan 21
- **E. Lynette Rayle** QA performance
 - Dave made some changes to address issues with 50x responses, still possible issues under high load (possibly something on the Sinopia side but waiting to look at IP address to logging to identify whether same source is hitting us with same request)
 - Ongoing discussion about the need build more complex indexes to deal with slowness of complex queries
 - QA server had too few DB connections with resulted in 500 errors, have now adjusted to allow more DB connections and seems fixed

Status updates and planning

- Cataloging Sinatra and other 45's (Discogs data, https://github.com/ld4p/qa_server/issues?q=is%3Aissue+is%3Aopen+label%3ADiscogs)
 - Usability - suffering from long vertical display with expanding sub-forms, lots of scrolling
 - Discogs QA module input is only using some data based on the profile being used, trouble filling in only work and not instance data when working from a work form with embedded instance. Steven will investigate whether template or profile changes can address this
 - Lookup performance still an issue but not even or even consistent within the same lookup. Seems also that there is an effect from overall load on the service. Steven/Lynette/Huda to work out where the problem lies
 - Lookups for place not usable, relies on work from Dave to fix: https://github.com/LD4P/qa_server/issues/248 & https://github.com/LD4P/qa_server/issues/240
 - Work is being done but places are not being recorded
- Enhanced Discovery (see also <https://wiki.duraspace.org/x/sJl7Bg> and <https://github.com/LD4P/discovery/projects/1>)
 - BAM! (to run through end October)
 - For reference: [Initial draft of BAM plan](#)
 - [BAM Screenshots](#) (Tim's call number screenshots added.)
 - Finishing up [lessons learned](#)
 - SMASH! (to run through end of January)
 - John showed demo of search text in Google Books for cases where we have no hits in the catalog, using results to find items in the catalog via ISBN. Want to expand to use OCLC number.
 - Huda showed demos doing string matching (non left anchored) in LSCH and then finding broader and narrower subjects. Going to do expanded search of broader and narrower for the facets that come back from the catalog text search.
 - Open meeting March 3, 2-3:30pm in Mann 102 and should Zoom it too
 - How will we decide what to take forward from KAPOW!, BAM! and SMASH!?
- Authority Lookups for Sinopia (Lookup infrastructure: https://github.com/LD4P/qa_server/projects/2, Authority requests: https://github.com/LD4P/qa_server/projects/1)
 - See above
 - Monitoring tests have been adjusted to run at night, required work with Robbie to adjust pingdom
- Travel and meetings (see [LD4P2 Cornell Meeting Attendances](#))
 - 5th International LODLAM SUMMIT at the The Getty Center in Los Angeles. February 3-4, 2020
 - Steven, Lynette and Simeon will attend
 - **E. Lynette Rayle** will put QA in for the "tool challenge": CFP due 1/17
 - [Knowledge Graph Conference](#) (Columbia University), May 6-7, workshops 5/4-5/5
 - Workshops due 1/15 (not doing this), proposals due 2/28, talks 20mins
 - **Huda Khan** will lead effort to consider proposal, discuss next week 2020-01-17
 - LD4 Conference at College Station, TX (TAMU) - May 13/14, 2020
 - Proposals due 2020-01-31 – https://stanforduniversity.qualtrics.com/jfe/form/SV_ebmQF48Gn9bag6x
 - Lynette will consider lookup best practices and discuss with OCLC
 - Steven/Tim to think about discogs "supervised conversion"
 - Huda/John/Tim/Steven to think about KPAOW! BAM! SMASH!
 - **Simeon Warner** to check on travel budget
 - rdfs:seeAlso [Conferences Related to Linked Data in Libraries](#)
- Next meetings:
