Beta 1 & 2 Sprint : Feb 3-14

- · Work towards finalizing the Beta1 tasks in DSpace 7 Release Plan spreadsheet. Goal is to have Beta1 released in mid-to-late Feb.
- Beginning work on Beta2 tasks (especially those with many dependencies)

Agenda

- (15 mins) Developer Stand Up Developers give brief updates on their effort (or their team's effort).
 - Update/see "Current Work" section below based on your status. Please feel free to update prior to meeting.
 - Please highlight any new work (needing reviews/testing), any blockers (for you), and any discussion topics you may have.
- (25 mins) General Discussion Topics
 - Revisiting Scripts & Processes endpoint PR#2648: Tim has concerns about usage of Bitstreams for temporary files (like uploaded CSVs, SAF Zips, AIPs, etc)
 - a. See also last week's discussion notes
 - 2. (Please add a topic)
- (20 mins) Planning for next week
 - Claim tasks for next week from DSpace 7 Release Plan spreadsheet
 - o Assigning PRs for Review

Attendees

- Art Lowel (Atmire)
- Andrea Bollini (4Science)
- Tim Donohue
- Lieven Droogmans
- Mark H. Wood
- Giuseppe Digilio (4Science)
- Ben Bosman
- Chris Wilper
- Paulo Graça

7.0 Release Goals

These resources define the prioritization and general schedule we are working towards

- DSpace 7 Release Goals : overview of goals/timelines & beta release process
- DSpace 7 Release Plan spreadsheet: our planning spreadsheet which details which features are scheduled for each Beta release.

Current Work

Legend for status icons ★ = Highest Priority tasks (please prioritize these reviews/tasks over others). = review done, changes were requested or bugs found. = review done, approved. 1 = review done, merge conflict or other minor changes requests = pull request only requires a single approval to merge. This is generally reserved for PRs which are either smaller, obvious, and /or bug fixes with tests to prove they work.

Claim a Ticket!

If you do not have access in JIRA or GitHub to officially claim the ticket you wish to work on, contact Tim Donohue

- Available Angular UI Tickets
 - Open issues in 7.0beta1 milestone (highest priority)
 - Open issues in 7.0beta2 milestone (second highest priority)
 - Open issues flagged as "Difficulty: low". These may be a good starting point for newer developers.
- Available REST API Tickets
 - Unassigned tickets scheduled for 7.0beta1 (highest priority)
 - Unassigned tickets scheduled for 7.0beta2 (second highest priority)
 - General REST API tickets flagged as "low hanging fruit". These may be a good starting point for newer developers.
 - General REST API unassigned bug tickets. Again, might be a good starting point for newer developers.

Delayed / Needs Discussion

- Managing Authorization info in Angular UI: How to pass Authorization rights (i.e. logged in user's access rights) from REST API to Angular? See for example: https://github.com/DSpace/dspace-angular/issues/393
 - a. In July 25 meeting, we noted this probably cannot be resolved with just one simple solution. May need to look at different options for different scenarios
 - b. Work is ongoing, but has been started in these areas:
 - i. Summary of ideas: REST Authorization
 - ii. Contract for Authorization Endocints: https://github.com/DSpace/Post7Contract/pull/02
 - iii. Contra
- 2. REST API Projections:

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

- a. Work begun in
 - i. Based on detail discussions in our Oct 17 meeting.
- b. (Outdated) Early work begun at https://github.com/DSpace/DSpace/pull/1847. Discussed in more detail in our Aug 22 meeting. Overall, this approach seems like a good direction, need volunteers to move it forward.
- c. https://github.com/DSpace/Rest7Contract/issues/2 (discussion resumed by Andrea Bollini (4Science) could be relevant for the projection)
- 3. Initial Performance Testing from Chris.
 - a. https://cwilper.github.io/dspace-perftest/
- 4. (REST Contract) Edit Homepage News: https://github.com/DSpace/Rest7Contract/pull/45
 - a. Delayed. General agreement (in meeting on March 21, 2019) that storing HTML in metadata fields is not really ideal behavior. Metadata (from a librarian standpoint) tends to be free of format-related markup (as that allows for easier sharing, understanding of metadata. Currently Community & Collection homepage information is HTML-based and is stored in metadata that is appropriate for a minor subset of information (like the title) but it is better to move large/rich text to bitstreams.
 - b. Proposal here is to consider storing HTML-based markup (for Site, Community & Collection homepages) in Bitstream(s) associated with the object in question. May allow for more CMS-lite behavior in the future
 - c. Timeline for this is uncertain. Possibly in 7 or 8. May depend on how/whether it can be scoped.
- 5. (Angular Bug) https://github.com/DSpace/dspace-angular/issues/368 (Art Lowel (Atmire))
- 6. Concurrency in DSpace 7 (or 8). What do we want to do when multiple editors are editing the same object? Needs further analysis regarding implementation details
 - We've decided (in meeting on March 7, 2019) to use ETags to implement concurrency. REST Contract notes on ETags: https://github.com/DSpace/Rest7Contract#etags--conditional-headers
 - b. ETags only update of the two fields match. If someone edits first, your edit would fail and you would get a fail response (422?)
 - c. ETags seems to have broader support in other REST APIs. Recommended also by both Art and Andrea.
