

# VIVO 1.11.1 Release Announcement

March 10, 2020

VIVO 1.11.1 is now available!

VIVO 1.11.1 is a point release containing two patches to the previous 1.11.0 release:

- Security patch that now prevents users with self-edit privileges from editing other user profiles ([pull-request #106](#))
- Minor security patch to underlying puppypcrawl dependency ([CVE-2019-9658](#))

Upgrading from 1.11.0 to 1.11.1 should be a trivial drop-in replacement. If you are upgrading from 1.10 or before, see [VIVO 1.11.0 Release Announcement](#).

VIVO 1.11.1 can be downloaded now from <https://github.com/vivo-project/VIVO/releases/tag/vivo-1.11.1>
