Goals

Discussion items

Time	Item	Who	Notes
	announcements		
	update on X?info spec 1. modeling, for a networked entity X, when a provider deems one or more physical, digital, or conceptual objects to be "equivalent" when referring to or accessing X, eg, the PDF, the HTML, the CSV file, or the "overview object landing page" that points to them all		

	2. modeling, for a hierarchical entity X in Y in Z, when an "overview" landing page (eg, Z) is different from a simple "parent" page Y 3. modeling, for hierarchical entity X in Y in Z, when X?info returns only what is recorded for X or when it returns a layered composite: X?info + Y?info + Z?info
