DuraCloud documentation

1. User documentation (wiki)
2. Deployment documentation (github)

Minutes

- Web archiving interest group in TX now, might be interested in Archive-It integration in the future. Danny is working in updating this tool for the new API.
- Jen Dandle, UCSD, did a first round of accessibility assessment with suggestions of where to start with DuraCloud UIs. She is also doing some work with a colleague who uses a screen reader, so might update.
- Chronopolis price dropped and DuraCloud is adjusting pricing for storage accordingly
- Univ Toronto: interested in Archive-It and a UI for the retrieval tool. Will roll some accessibility into that. Also looking at internationalization as well. At least 6 months before they can start, but not dependent on grant funds.

- Sprint Planning - the timing we discussed tentatively is looking difficult for LYR, Danny would not be able to participate. How does August look?
- Not clear when DSpace 6.4 will be released. Moving to August would be possible for TDL. Univ Toronto can't participate in a sprint for at least 6 months. Will look to coordinate the following sprint with Univ Toronto.
- NEW SPRINT DATES Moved to 17th of August and 24th of August
- Reviewed development focus (above)
- Nick still planning to look at updating to newer Elastic Beanstalk environment, Bill to create a ticket for tracking this work
