

Change a form value

Submit: Describe this Item

Please fill in the requested information about this submission below. In most browsers, you can use the tab key to move the cursor to the next input box or button, to save you having to use the mouse each time. ([More Help...](#))

Enter the names of the authors of this item below.

	Last name e.g. <i>Smith</i>	First name(s) + "Jr" e.g. <i>Donald Jr</i>
Authors	<input type="text"/>	<input type="text"/>

Enter the main title of the item.

Title

Enter the series and number assigned to this item by your community.

	Series Name	Report or Paper No.
Series/Report No.	<input type="text"/>	<input type="text"/>

If the item has any identification numbers or codes associated with it, please enter the types and the actual numbers or codes below.

Identifiers

Select the type(s) of content of the item. To select more than one value in the list, you may have to hold down the "CTRL" or "Shift" key.

Type

Animation

Article

Book

Book chapter

Dataset

Learning Object

Select the language of the main content of the item. If the language does not appear in the list below, please select 'Other'. If the content does not really have a language (for example, if it is a dataset or an image) please select 'N/A'.

Language

(Fields with Form Values)

Files:

- [dspace/config/input-forms.xml](#)

Instructions:

1. Look for the `<form-value-pairs>` element in `input-forms.xml`.
2. Look for the `<value-pairs>` element for the Dublin Core element whose values you wish to change.
3. Add or change a `<pair>` element, where the `<displayed-value>` element contains what the submitter sees in the dropdown box, and the `<stored-value>` element contains what DSpace should archive as the information's label:

```
<pair>
  <displayed-value>Gov't Doc #</displayed-value>
  <stored-value>govdoc</stored-value>
</pair>
```

4. Stop and restart Tomcat (See Quick Restart in [Rebuild DSpace](#)).

Notes:

- This set of instructions changes the existing choices when DSpace displays an option-box or dropdown menu, as for the Dublin Core "type" and "language" elements. It does not add a new submission widget/field to the user interface; to do this, see [Alter submission input forms](#).
