

# DSpace Release 1.5.2 Notes

## Version 1.5.2

### Release Notes

1.5.2 contains numerous bug fixes and feature improvements, including:

- SWORD module/version 1.3.1 supporting the sword standard version 1.3
- Cocoon upgraded to 2.2
- Fix for the UTF-8 issues with the XMLUI
- New authentication methods: Hierarchical LDAP and Shibboleth
- Full update translations: German, Italian for both XMLUI and JSPUI and Ukrainian for JSPUI
- New translations for 1.5.x: Greek and Thai
- Graceful resolver for urn in the item page for the JSPUI

Please refer to [Jira](#) and the [SVN](#) history (see below) for details on these and all the others modifications.

DSpace 1.5.2 can be downloaded from the files area in [SourceForge](#) or via [SVN](#)

### Installation Documentation

The DSpace System Documentation is available from our list of [DSpace Resources](#).

#### Release Coordination

- Andrea Bollini

#### Timeline and Proceeding

Please assign yourself to the new trackers on JIRA system (<http://jira.dspace.org/jira/browse/DS>) and put anything you want to get done in the wiki. Please note that the trackers on SF are again available, if you get any issues using the new JIRA System you are free to post on SF. We'll do our best to move and keep up-to-date any issues reported in SF to JIRA.

Projected timeline:

- Freeze 20 Mar 2009 with a "stable" proposal of addressed issues **-extension time:** commit for testathon allowed until 23th March
- **Testathon day:** 25 Mar 2009 (from 10 GMT to 22 GMT)
- **Release 6 Apr 2009 - \*postponed** due some critical bugs, see [email](#) to the lists and [revision 3684](#)
- Release of a RC - TBA
- Final release expected 14 Apr 2009

Note: also if this is a minor point release, we invite the community to get involved in the [Testathon day](#). To make this maintenance release the most stable as possible **we need your help!**

Release Process needs to proceed according to the following Maven release process: [Release Procedure](#)

#### Test instances

If you want to provide a test instance for 1.5 development, check out code from the 1.5x branch:

```
svn co https://dspace.svn.sourceforge.net/svnroot/dspace/branches/dspace-1_5_x/ /path/to/your/src
```

#### Continuous Integration

We now have [Continuous Integration](#) Support via the valiant efforts of [Elliot Metsger](#). This means that the most current integration build is available for download and testing at the following URL's

- DSpace 1.5.2 SNAPSHOT Release <https://integration.nts.jhu.edu/bamboo/download/DS-15X/artifacts/latest/Binary-Distributions>
- DSpace 1.5.2 SNAPSHOT Source Release <https://integration.nts.jhu.edu/bamboo/download/DS-15X/artifacts/latest/Source-Distributions>
- DSpace 1.5.2 SNAPSHOT Modules <https://integration.nts.jhu.edu/bamboo/download/DS-15X/artifacts/latest/Binary-Modules/>

# General Major Changes

No major changes will be presents in the 1.5.2 release

## Release Critical Bugs

### Known Issues

- [DS-91] Collection Admin role not working - ID: 2081981 - <http://jira.dspace.org/jira/browse/DS-91>  
(and a host of others...) <http://jira.dspace.org/jira/secure/IssueNavigator.jspa?reset=true&pid=10020&status=1> (check also for comparison [http://sourceforge.net/tracker/?group\\_id=19984&atid=119984](http://sourceforge.net/tracker/?group_id=19984&atid=119984))

You can check the subset that will be addressed in the 1.5.2 release using the "schedule filter" of the JIRA system

Please, if you found any relevant bugs reported in SF that has not reported in JIRA, add it yourself, appending to the title the suffix "ID: xxxx", where xxxx is the request no on SF. Alternately you can report the missed bugs sending an email to the [devel mailing list](#)

36 80	06 /04 /20 09 21. 32	bo lin i	add reference to JIRA to all CHANGES related to SF - for each issue, I have reported in the JIRA comments the revision where the patch was committed
36 79	06 /04 /20 09 16. 38	br ad m c	Rename the html and pdf build script to be more obvious. Incorporate 1.5.2 documentation notes from Graham Triggs, Mark Diggory, Larry Stone. Regenerate the html and pdf.
36 75	06 /04 /20 09 10. 07	m di gg or y	[DS-154] Make a backup of the config dir on Ant update
36 74	03 /04 /20 09 23. 12	td on oh ue	Minor change to log4j.properties. The Checksum Checker log (checker.log) settings should not be additive. In other words, the checksum checker should only log to '\checker.log\' and not also to the default '\dspace.log\'.
36 73	03 /04 /20 09 22. 54	td on oh ue	Applying fix for Jira [DS-120] "Cocoon 2.2 'hijacks' the dspace.log file". Essentially moving all Cocoon's log4j configurations into the normal DSpace log4j.properties file. This also adds a separate 'cocoon.log' file for the XMLUI for all logs generated by Apache Cocoon. It also doesn't seem to affect the JSPUI's normal logging. This change also fixes Jira [DS-85] "XMLUI Cocoon logs should not be stored under [xmlui-webapp]/WEB-INF/logs/"
36 72	01 /04 /20 09 12. 40	gr ah a mt rig gs	DS-131 Fix title ordering to ignore leading non-alphanumeric characters Now uses Marc 21 multi-lingual rules by default
36 64	31 /03 /20 09 17. 34	td on oh ue	Applying fix for Jira [DS-132] XMLUI overall UTF-8 encoding is inconsistent and forms do not use UTF-8. This fix also resolves [DS-112] Scandinavian characters mess up Front page full text search. Essentially, I'm adding a Cocoon Filter which forces UTF-8 encoding for all servlet requests. This was based on recommendations on the Cocoon wiki: <a href="http://cocoon.apache.org/2.2/1366_1.html">http://cocoon.apache.org/2.2/1366_1.html</a> This seems to resolve these issues so that I can now submit/search/browse/edit items which have Scandinavian (or other non-English) characters.
36 63	31 /03 /20 09 16. 50	br ad m c	Update headings to 1.5.2, and fix most of the broken internal links. More to follow.

36 62	31 /03 /20 09 13. 18	bo llin i	missed jira entries

36 26	23 /03 /20 09 12. 26	cj ue rg en	Changed bug fix entry, my contribution wasn't that significant

36 25	23 /03 /20 09 12. 18	bo lin i	[DS-102] Submission without file possible with the skip upload functionality disabled [DS-103] Use of the Progress bar button don't save the current page modification [DS-104] Cancel/save button during edit of a workflow item doesn't work
36 24	23 /03 /20 09 10. 28	bo lin i	[DS-46] Bug 1617889 Years < 1000 do not display in simple item view - ID: 2524083
36 23	23 /03 /20 09 10. 03	bo lin i	[DS-43] Manakin RSS feed generator cache timeout can't be adjusted - ID: 2593393
36 22	22 /03 /20 09 9.4 6	bo lin i	[DS-107] DIDL Crosswalk thrown NPE overwrite previous wrong fix
36 21	21 /03 /20 09 12. 57	bo lin i	Added default value if no oai.didl.maxresponse property is defined
36 20	20 /03 /20 09 21. 46	td on oh ue	[1712125] Allow dsrun and dsrun.bat to use JAVA_OPTS. Previously all JVM options were hardcoded in dsrun scripts. This allows admin to specify JVM options for all command-line scripts using the JAVA_OPTS environment variable.
36 19	20 /03 /20 09 17. 52	td on oh ue	Minor improvements to messages output by MediaFilterManager. Added item handle information to the \"SKIPPED:\" and \"FILTERED:\" messages. Without the item handle it's much more difficult to locate bitstreams which may be having problems filtering, etc.
36 18	20 /03 /20 09 10. 45	cj ue rg en	Added missing blanks between label and text value in subscription email.
36 17	20 /03 /20 09 10. 41	cj ue rg en	Added missing blanks between label and text value in subscription email.
36 16	20 /03 /20 09 10. 19	bo lin i	fix typo in javadoc
36 15	20 /03 /20 09 3.4 1	st ua rtl e wi s	Adds new functionality to the export scripts: '\migrate' option that strips metadata that will be re-created in the same fashion as the dspace_migrate script. This can be invoked by using the -m or --migrate flag on the export cli script, or with the new JSPUI export (migrate) button. This patch also fixes DS-59.
36 14	20 /03 /20 09 2.5 8	st ua rtl e wi s	Adds new functionality to the export scripts: '\migrate' option that strips metadata that will be re-created in the same fashion as the dspace_migrate script. This can be invoked by using the -m or --migrate flag on the export cli script, or with the new JSPUI export (migrate) button. This patch also fixes DS-59.
36 13	19 /03 /20 09 20. 31	td on oh ue	Minor Fix: Add an invisible link to the /htmlmap sitemap to the XMLUI footer by default. This allows search engines to be able to find that HTML sitemap link for the out-of-the-box XMLUI.
36 12	19 /03 /20 09 18. 10	bo lin i	fix wrong file header

36 11	19 /03 /20 09 10. 37	bo llin i	[DS-101] Impossible to complete Registration in JSUI	
36 10	19 /03 /20 09 5.0 1	m di gg or y	[DS-100] XMLUI OpenURL support contributed by the National Evolutionary Synthesis Center (NESCent) and @mire.	
36 09	19 /03 /20 09 3.2 1	st ua rtl e wi s	Fix for Jira [DS-98] Key.jsp.mydspace.request.export.community not set in Messages.properties	
36 05	17 /03 /20 09 21. 24	td on oh ue	Fix for Jira [DS-97] XMLUI does not come with a robots.txt out-of-the-box. It also does not provide suggestions for loading global static content. Added a default robots.txt file for XMLUI. Also updated Docbook configuration documentation to document the basics on how to add additional global static content (esp. static HTML) to the newly created /src/main/webapp/static/ folder for XMLUI.	
36 04	17 /03 /20 09 20. 17	td on oh ue	Fix for Jira [DS-96] XMLUI Wing-Framework '\Radio' class doesn't support adding radio buttons which are unselected by default.	
36 03	17 /03 /20 09 20. 03	td on oh ue	Minor fixes to look of XMLUI Submission process. In the review information for the DescribeStep, ensure that empty fields are not displayed when reviewing metadata (no reason to display fields that weren't filled out...plus they cause a very long review page). On the "Save or Remove" page, make sure all three buttons are in the same HTML . This allows for easier styling of the buttons (otherwise it's nearly impossible to place them all on the same line).	
36 02	17 /03 /20 09 18. 02	td on oh ue	Fix for Jira [DS-95] XMLUI: Visiting an item page with a trailing slash returns a 404 message	
36 01	17 /03 /20 09 17. 47	td on oh ue	Fix for Jira [DS-87] XMLUI file download links break in Google search results if file '\sequence' number changes.

35 96	17 /03 /20 09 8.0 5	bo llin i	[DS-83] Hardcoded behaviour of Initial question step in the submission	
35 94	17 /03 /20 09 7.2 9	bo llin i	[DS-78] Italian translation xmlui - ID: 1984513 (gone into google code)	
35 93	17 /03 /20 09 7.2 6	bo llin i	[DS-64] xmlui selection of authentication method - ID: 2086673	
35 90	15 /03 /20 09 3.3 0	m di gg or y	[DS-93] Upgrade XMLUI to Cocoon 2.2	
35 89	13 /03 /20 09 23. 01	Sc ott Ph illi ps	(Scott Phillips) Added the ability to stop or start recording anonymous or bot activity. With this patch it also removes viewing web continuations which are not needed now that you can view current activity on the site.	

35 88	13 /03 /20 09 18. 21	Sc ott Ph illi ps	(Scott Phillips) Fixed a problem where importing/exporting items multiple times would result in duplicate identifier.uri metadata records being added each time. Now it will check to see if the metadata record exists before adding it.	
35 87	13 /03 /20 09 11. 21	bo llin i	[DS-90] Workflow doesn't skip if the wf group contains empty subgroups	
35 86	13 /03 /20 09 10. 45	bo llin i	[DS-47] Add support for rendering DOI links in JSPUI (1.4, 1.5) - ID: 2521493	
35 85	13 /03 /20 09 10. 38	bo llin i	[DS-88] Anonymous group don't work as subgroup - ID: 1688445 [DS-61] IP Authentication only works on logged in users - ID: 2088431	
35 84	13 /03 /20 09 10. 26	bo llin i	fix wrong indent	
35 83	13 /03 /20 09 10. 25	bo llin i	fix minor typo	
35 81	12 /03 /20 09 20. 05	td on oh ue	Fix for Jira bug [DS-86] XMLUI Feedback form does not include any protection from spamming. Basically just copied over the same logic that is used already in the JSPUI and tested that it works for XMLUI as well.	
35 75	11 /03 /20 09 15. 33	bo llin i	[DS-60] netid.toLowerCase() in different classes and methods - ID: 2458187	
35 74	11 /03 /20 09 14. 42	bo llin i	[DS-58] Double quote problem in some fields of JSPUI (continued) - ID: 2528065	
35 73	11 /03 /20 09 12. 00	bo llin i	[DS-84] Improve API for \"IgnoreAuthorization\" blocks - ID: 1687783	
35 72	11 /03 /20 09 11. 14	bo llin i	[DS-62] Not right encoding for license and extracted texts - ID: 2234532	
35 45	09 /03 /20 09 16. 02	Sc ott Ph illi ps	(Scott Phillips) Fixed two bugs. 1) Sometimes a null event would get into the event queue which would choke during sorting. I've added protected the sorting and event display from null pointers, and synchronized the event queue manipulation from getting null events into the queue. 2) Fixed the i18n header from not displaying how many pages maximum its suppose to view, the parameter just wasn't being passed but the i18n tag was expecting it.	
35 39	07 /03 /20 09 20. 08	Sc ott Ph illi ps	(James Creel) Fixed some minor display bugs on the submission form for initial questions.	
35 38	07 /03 /20 09 20. 04	Sc ott Ph illi ps	(Scott Phillips) There is a bug where user supplied query strings that contain \"\:\" were being written straight to the logs unescaped. This would cause the loganalyser to think in some cases that there were logging events of random strings. This patch ensures that all cases where search strings are being written to the logs are escaped to prevent this.	

35 29	05 /03 /20 09 23. 46	ric ha rd- jo ne s	remove extraneous directory
35 28	05 /03 /20 09 23. 42	ric ha rd- jo ne s	SWORD version 1.3.1 supporting the sword standard version 1.3.
35 27	05 /03 /20 09 23. 23	ric ha rd- jo ne s	Remove existing common sword code; This will temporarily break the build, but is necessary to smooth the path to including the new code...
35 26	05 /03 /20 09 18. 41	m di gg or y	Artifactory considers this to be an incorrect format for Maven identifiers.

34 85	18 /02 /20 09 23. 43	sc ott ph illi ps	(Scott Phillips) This patch fixes a bug that occurred when DSpace is configured to disallow users from editing their metadata (name, phone number, etc – typically because shibboleth or LDAP is being used). When configured this way if a user editing their subscriptions they would see their metadata fields be in error because the submit side of the form had an error.
34 84	18 /02 /20 09 23. 39	sc ott ph illi ps	(Scott Phillips) Added protection for displaying statistic reports when some data (almost always incorrect data) will be too long and blow up the page. This can not be fixed by CSS or HTML in the case where the data does not contain any spaces, dashes, periods or other breakable points for a browser to use. In these cases the HTML table may extend far off the page causing all sorts of display problem. This patch adds limits to the size of data being displayed.
