

# 2020-10-06 - VIVO Development IG

## Date

06 Oct 2020

## Call-in Information

Time: 11:00 am, Eastern Time (New York, GMT-04:00)

To join the online meeting:

- Go to: <https://lyrasis.zoom.us/my/vivo1>
- One tap mobile:
  - US: +16699006833,,9358074182# or +19292056099,,9358074182#
- Or Telephone:
  - US: +1 669 900 6833 or +1 929 205 6099 or 877 853 5257
  - Meeting ID: 935 807 4182
- International numbers available: <https://zoom.us/j/aeANHanzED>

## Slack

- <https://vivo-project.slack.com>
  - Self-register at: <http://bit.ly/vivo-slack>

## Attendees

★ Indicating note-taker

1. [William Welling](#)
2. [Andrew Woods](#)
3. [Alexander \(Sacha\) Jerabek](#)
4. [Benjamin Gross](#) ★
5. [Ralph O'Flinn](#)
6. [Huda Khan](#)
7. [Don Elsborg](#)
8. [Brian Lowe](#)

## Agenda

1. i18n update
  - a. Unable to locate Jira server for this macro. It may be due to Application Link configuration. - need one more review, [Benj](#)
  - b.
  - c. Unable to locate Jira server for this macro. It may be due to Application Link configuration. - the final lynchpin
2. Simplifying
  - a.
  - b. Unable to locate Jira server for this macro. It may be due to Application Link configuration.
3. Moving [Scholars](#) closer to core - next steps
  - a. [SelectQueryDocumentModifier](#)
  - b. Entities: Collection, Concept, Document, Organization, Person, Process, and Relationship
  - c. Configuring Solr
4. Moving [Data Ingest Task Force](#) forward
5. Renaming of 'master' branch?
  - a. Update: "[GitHub](#) to replace 'master' with 'main' starting next month"

## Future topics

1. [Vitro JMS messaging approaches](#) - redux
  - a. Which architectural pattern should we take?
  - b. What should the body of the messages be?

## 2. Renaming of 'master' branch? (ZDNet, BBC)

- Guidance from GitHub
- DSpace has done it
- Fedora has done it
- Samvera is doing it

## 3. Incremental

- 
- Unable to locate Jira server for this macro. It may be due to Application Link configuration.
- Unable to locate Jira server for this macro. It may be due to Application Link configuration.

# Tickets

## 1. Status of In-Review tickets

type	key	summary	assignee	reporter	priority	status	resolution	created	updated	due
Unable to locate Jira server for this macro. It may be due to Application Link configuration.										

# Notes

Draft notes in Google-Doc

- i18n update
  - Andrew - I don't think much has been done since our last call. True.
  - VIVO-1848 - i18n: Improve Identification of files to filter **IN REVIEW** - need one more review,
    - Benjamin Gross has "approved"
    - Another review would be preferred
    - Removes the available.langs file
    - Changes structure of rdf directory - see <https://github.com/vivo-project/Vitro/pull/169> for the new directory structure
    - Retains the directory of the language agnostic files from before
  - VIVO-1885 - i18n-regression-test documentation **IN REVIEW**
    - Just here FYI
  - Andrew: It's challenging, but he's gotten it to work from the documentation
- VIVO-1918 - i18n: Reload firsttime files on start-up if changed **IN PROGRESS** - the final lynchpin
  - Leading to a more exciting discussion on RELEASING THE BETA (of the merged i18n work).
  - Brain Lowe should have an opportunity to work on it in October
  - Brian: Is there still a concern about page rendering speed with language filtering turned on?
  - Andrew: Is caching a possibility?
  - Brian wants to look at the filtering mechanism algorithm. The actual amount of data returned when languages are enabled is not significantly more, but we lose a lot of time in the filtering mechanism itself.
  - Or can we order the result set from the queries so the language data is grouped together?
  - Andrew: Is there a small example dataset to evaluate the difference between languages on and off?
  - So remaining issues: Reload firsttime, performance, and a boatload of documentation (Andrew points to Sacha gently)
  - Does it make sense to schedule another sprint?
  - Ralph: Perhaps a two week sprint? Andrew: Perhaps first week, finish i18n work then second week prepare the release.
  - Ok, so do we need a sprint? If so, what is the nature of the sprint? Sacha says he could focus on documentation for a week. Brian and Benjamin will not be able to devote an entire week to a sprint. Others may be able to participate (eg Dominik) and we will rely on the committers for reviews.
  - Huda will provide ONE WEEK of moral support
  - Andrew will attempt to schedule with Ralph and Sacha (plus Dominik and Mathias and UQAM folks).
- Distillation of priorities: <https://docs.google.com/spreadsheets/d/17tf15-q8DmRTI-Vc2MiONsscaQ4JBIAWy7SbvzXdL40/edit#gid=0>
  - Note #7 - simplifying installation
- Simplifying installation
  - VIVO-1443 - Decouple VIVO build from installation **IN PROGRESS**
    - Not actively in progress
- VIVO-1752 - Instantiate Solr core via API **OPEN**
  - Two tasks: process for auto-configuration and determining the correct configuration
  - See updates to <https://jira.lyrasis.org/browse/VIVO-1752>
  - TAMU uses a Spring solr library to manage the schema. Still requires an initial config.

- iv. It's not clear if Solr is really intended to be built this way
  - v. Andrew is concerned if Solr exists outside the VIVO server
  - vi. Brian reports that in the past people have requested having Solr on a separate server... but we don't usually do that.
  - vii. Brian - even if we can't create the config via API perhaps the Schema could be created?
  - viii. Spring API solr requires a collection to exists... could be default. Will read your annotated solr document files and update the schema for you.
    - 1. Some gotchas... e.g. can't mutate certain types of fields
1. Moving [Data Ingest Task Force](#) forward
    - a. Haven't heard from them in awhile
  2. Renaming of 'master' branch?
    - a. Update: "[GitHub to replace 'master' with 'main' starting next month](#)"
    - b. Might still be some work on the GitHub side for easy migration

## Actions

- [Benjamin Gross](#) to merge VIVO-1848
