Confluence Wiki Markup Resources

The below examples are just that – examples! There are many more things you can do with Confluence. For a full list of ideas and approaches see the Confluence documentation:

- [Notation/Formatting Overview](#)
- [Full Guide](#)
- [Code Formatting Guide](#)

Basic Wiki Markup Formatting

This section is only valid if you prefer to edit the Wiki using the "Wiki Markup" tab. If you instead tend to use the "Rich Text" tab, most of these basic formatting options are built into the editing toolbar

Format	What you need to type (in Wiki Syntax)	What you will get
Bold / Strong	<code>*strong*</code>	strong
Italics / Emphasis	<code>_emphasis_</code>	<i>emphasis</i>
Inline Citation	<code>??citation??</code>	<i>citation</i>
Deleted / Strikethrough	<code>-deleted-</code>	deleted
Underlined	<code>+underlined+</code>	<u>underlined</u>
Superscript	<code>word ^superscript^</code>	word ^{superscript}
Subscript	<code>word ~subscript~</code>	word _{subscript}
Inline Code	<code>{{ inline monospaced code }}</code>	inline monospaced code
Colored Text	<code>{color:red}look ma, red text!{color}</code>	look ma, red text!
Code Sections	<code>{code}sections of formatted code{code}</code>	<pre>sections of formatted code</pre>
Block Quote	<code>{quote}here is quoteable content to be quoted{quote}</code>	<div style="border-left: 1px solid #ccc; padding-left: 10px;"><i>here is quoteable content to be quoted</i></div>
Formatted Panel See Panel Macro for more styling tips.	<code>{panel}text in here displays in a panel{panel}</code>	<div style="border: 1px solid #ccc; padding: 5px;">text in here displays in a panel</div>
Info Box See Info Macro for more styling tips.	<code>{info}This is an informational box{info}</code>	<div style="border: 1px solid #ccc; padding: 5px;">This is an informational box</div>
Note Box See Note Macro for more styling tips.	<code>{note}This is a note{note}</code>	<div style="border: 1px solid #ccc; padding: 5px;">This is a note</div>

Warning Box See Warning Macro for more styling tips.	{warning}This is a warning{warning}	This <u>is</u> a warning
Linking to Attached Files See Linking to Attachments for more info.	[Text-or-Title ^filename.doc]	(A <i>link to the file named 'filename.doc', attached to the current page</i>)

Headings

What you need to type (in Wiki Syntax)	What you will get
h1. Biggest heading	Biggest heading
h2. Bigger heading	Bigger heading
h3. Big heading	Big heading
h4. Normal heading	Normal heading
h5. Small heading	Small heading
h6. Smallest heading	Smallest heading

Lists

What you need to type (in Wiki Syntax)	What you will get
Bulleted List: * Item 1 ** Item 1.1 ** Item 1.2 * Item 2	Bulleted List: <ul style="list-style-type: none"> • Item 1 <ul style="list-style-type: none"> ◦ Item 1.1 ◦ Item 1.2 • Item 2
Numbered List: # Item 1 ## Item 1.1 ## Item 1.2 # Item 2	Numbered List: <ol style="list-style-type: none"> 1. Item 1 <ol style="list-style-type: none"> a. Item 1.1 b. Item 1.2 2. Item 2
Numbered & Bulleted List: # Item 1 #* Item 1.1 #* Item 1.2 # Item 2	Numbered & Bulleted List: <ol style="list-style-type: none"> 1. Item 1 <ul style="list-style-type: none"> • Item 1.1 • Item 1.2 2. Item 2

Tables

See <http://confluence.atlassian.com/display/DOC/Working+with+Tables>

Icons / Emoticons

Some examples:    

See: <http://confluence.atlassian.com/display/DOC/Confluence+Emoticons>

Table of Contents

For the DSpace Wiki, we tend to use two main types of Table of Contents:

- Outline Table of Contents (numbered). For outline TOC (e.g. [DSpaceResources](#)), add the following to the top of the page:

```
{toc:outline=true|style=none}
```

- Bullet Table of Contents (bullet points). For bulleted TOC (e.g. see top of this wiki page), add the following to the top of the page:

```
{toc}
```

For more information on formatting a Table of Contents, see the [Confluence toc Macro instructions](#)

Redirect Pages

No longer used, as the plugin expired.

"Redirect Pages" are pages whose sole purpose is to redirect the user to a different location in Confluence. For the DSpace Wiki, we use "Redirect Pages" to retain the location of the "Current Release Notes" at [Current Release](#). So, that [Current Release](#) page will **always** redirect you to the Release Notes for the latest version of DSpace Software.

To create a Redirect page, insert the following as the **only** content in the page:

```
{redirect:<page-to-redirect-to>}
```

If you ever need to edit an existing Redirect page, just add `?redirect=false` on the end of the URL. For, example, use the following URL to edit the [Current Release Redirect Page](#): <https://wiki.duraspace.org/display/DSPACE/CurrentRelease?redirect=false>

For more information on Redirect Pages, see the [Confluence redirect Macro Instructions](#)

Creating your own Personal Page(s) in Wiki

In Confluence, you can create your own *Personal Space* by doing the following:

- Login to Confluence
- Use the top right dropdown (displaying your name), and select "Create Personal Space"

This will create your own personal space at the location `~<your-userid>:Home` in this wiki. For example, [Tim Donohue](#).

You can link to this new personal space by creating links with the location being:

```
~<your-userid>:Home
```

For example, the following would create a link named "Your Name" pointing at your personal space.

```
[Your Name|~<your-userid>:Home]
```

Once you have your personal space established, you can also create your own sub-pages of that space, which you can use for your own notes, thoughts, etc. You can even use this personal space as a basic "blog", by creating daily/weekly "News" items (see the *Add -> News* menu). For an example of this, see [Chris Wilper's personal space](#) (Chris is the Fedora Tech Lead).

- NOTE: If you want anonymous users to be able to view your personal space contents, you'll need to do the following:
 - Visit your personal space
 - Select "Browse -> Space Admin" in the upper right menu
 - Modify your own personal space's "Permissions" to allow for anonymous user to View your space's contents (by default, only logged in users can view your personal space).

Migrating your old personal pages to your new "Space"

You may "migrate" your existing personal pages to your Personal Space by completing the following steps...

1. under the tree list of pages, consolidate all your personal pages under your preexisting old mediawiki personal page.
 - <https://wiki.duraspace.org/pages/listpages-dirview.action?key=DSPACE>
2. Go to your personal page in the DSPACE space, open your old personal page
 - for instance: <https://wiki.duraspace.org/display/DSPACE/BradleyMcLean>
3. under tools, select move and in the dialog at the bottom of the page for space, select you personal space in Confluence.
 - <https://wiki.duraspace.org/pages/editpage.action?pageId=19628039&locationShowing=true#locationSection>
4. Saving will move the entire tree of personal pages into your personal space.

5. Further, you may set the default page for your personal space to be your old mediawiki personal page under your personal space admin.
 - <https://wiki.duraspace.org/spaces/editspace.action?key=~<your-id>>
6. all preexisting links to your name/pages will move accordingly to point at your personal space.
