Notes

1. Announcements
 - a. David says that there's a lot of interest in Fedora 6.
 - b. [UC Davis](#) is interested in F6
 - c. Mike Ritter will be joining next week
2. Sprint
 - a. [Review of the Board](#)
 - b. Sprint going well
 - c. What is the target for the final release? What tickets still need fixed? Where is the line?
3. Questions/discussions:
 - a. is `for:fixity` still considered deprecated?
 - i. There are some users who expect this functionality to exist
 - ii. Leave it till there's a viable replacement
 - iii. Something needs to be added to the spec
 - b. Do we need F2 code in the migration utils?
 - i. Unsure if the F2 code works or if anyone still uses F2
 - ii. Seems like it's okay to remove
 - iii. Ben wants to migrate the entire FOXML without splitting it up as part of a PLAIN_OCFL migration
 - c. Removing `fcrepo-config.xml`
 - i. <https://github.com/pwinckles/fcrepo4/commit/16205c9e0386048e5138c2cd402d55066170ed23>
 - ii. Moving beans to Java Config and adding properties for configuring without touching spring
 - iii. Should be fine for most use cases. Unclear if people have custom auth configurations that may be more difficult for them to configure – still requires custom spring config
4. Performance Testing
 - a. [Performance Testing Criteria](#)
