DevMtg 2010-06-09

Developers Meeting on Weds, June 9, 2010

Agenda

- Any Announcements / Additional Agenda Items?
- GSoC updates
  - Unit Testing Project will be meeting in #duraspace at 21:00UTC (immediately after this meeting).
- DSpace 1.6.2 updates – when will it be released?
- Discussion Topics:
  - DSpace-Fedora Integration FAQ – At OR10, DuraSpace will be making an official recommendation that we work towards integration with Fedora (we'll also have time to discuss this at our Committers/Dev Mtg on Mon, July 5 before OR10). This is a very initial (unadvertised, but public) FAQ on the topic. We'd like any feedback/suggestions from all of you before we advertise this more broadly.
  - DSpace Services Framework – It's been two weeks since our Special Topics Meeting. Are we any closer to making some recommendations on moving forward? Has everyone had a chance to review the current Services work in 1.6.x?
- JIRA Catch-Up – starting with issue DS-528 (and getting as far as we can).
  - Search for recent JIRA Issues

Following this session there will be a special meeting to discuss the GSoC testing project: http://wiki.dspace.org/confluence/display/DSPACE/GSOC10+-+Add+Unit+Testing+to+Dspace

Meeting Notes

1.6.2 release scheduled for June 16, Initial discussion of Fedora Integration idea

- 1.6.2 release date is June 16
- Discussion of DuraSpace proposal to integrate DSpace & Fedora: DSpace-Fedora Integration FAQ. Will be officially announced at OR10.
  - Discussion of future collaborative meetings – several committers favor IRC over Skype
  - Discussion of what's in it for individual institutions
  - Desire to get Fedora committer(s) on board with ongoing GSoC projects

Meeting Transcript

- Full IRC Transcript available at - http://www.duraspace.org/irclogs/index.php?date=2010-06-09
