Agenda

Topic
Current priorities 1. Validate migrated Fedora 3 data 2. Update Fedora 6 instance to latest build 3. Copy and mount migrated Fedora 6 content 4. Complete migration 5. Test content in Fedora 6
Status updates 1. What is everyone working on? 2. Are there any blockers? 3. What are the anticipated timelines?
Wrap-up and next steps

Notes

1. Migration to AWS server about 75% complete
   a. David will follow up with Steve on Monday for a status report
2. Steve's parallel local migration failed due to a hard drive getting unplugged
   a. Steve will restart migration with checksum validation off to benchmark performance and determine if this is a significant bottleneck
   b. Disk usage was much higher with this migration than the AWS migration. Maybe due to Ex-FAT storage layout?
3. Once the migration is complete it will be tested in the new Fedora 6.0 AWS instance
