

# 2021-04-22 Outreach WG Agenda and Notes

## Date

22 Apr 2021

## Attendees

- Tracy Seneca
- Kurt Ewoldsen
- Julien Raemy
- Roxana Maurer
- John Kunze
- Maria Gould
- Peter Collropy

## Goals

- wikipedia page; ok I have my NAAN, what now?

## Discussion items

Time	Item	Who	Notes
	announcements		<p>Project has created an ARK plug-in for ARKs (DOI plug-in already existed). John will turn this into a blog post for the next newsletter. DOIs used for journals &amp; issues, but ARKs used for article-level identifiers.</p> <p>Maria Gould attended the PID Forum and believes there is space there to create an ARK niche within their activities and participate going forward (<a href="http://pidforum.org">pidforum.org</a>).</p> <p>(RM) ARK is included in a UK cultural heritage persistent identifier guide and since it is alphabetical, it comes first! URL needs to be updated from n2t.net to arks.org</p>
	upcoming meetings, calls for papers, submission deadlines		<ul style="list-style-type: none"><li>• DLF Forum deadline for proposals is May 17th (<a href="https://forum2021.diglib.org/call-for-proposals">https://forum2021.diglib.org/call-for-proposals</a>)</li><li>• No PASIG this year</li><li>• Deadline for iPRES proposals is April 30th:<ul style="list-style-type: none"><li>◦ IIIF &amp; persistent identifiers</li><li>◦ Changes in ARK specification</li></ul></li><li>• IIIF conference schedule not yet released, but there is an ARK related session included (the company is called Pleade - <a href="https://pleade.com/">https://pleade.com/</a>)</li><li>• LibNova (vendor) LibSafe (product) worked with Tracy and added ARK support through EZID. (RM) British library is also using that product and is a big ARK user, so this could become a more generic solution.</li><li>• JAK spoke with the author of the Dutch PID guide and ARKS will be included in the next version. (Thanks to Roxana for bringing this to our attention)</li></ul>
	draft the page "OK I have my NAAN, what now?" (Tracy actually made a stab at this with her formulation of the tree of info under <a href="http://arks.org/about">arks.org/about</a> )		<p>(RM) Reviewed Tracy's draft and now believes that all of the information is on the web page, but the amount is overwhelming. Should we create a blog post or message template for how to respond to these requests.</p> <p>(JK) So a Quick Start guide approach is what is called for? Yes.</p> <p>(TS) Take the Getting Started topics on the existing page and put them at the top of the page/list, so they are the first things up for viewers.</p> <p>(JK) The plug-in page needs to be reviewed and updated. Tracy volunteers to reach out to posters and get updates / validate captured information.</p> <p>(JK) The EZID codebase is becoming more mature and potentially useful to others in the ARK community.</p> <p>(MG) The code is openly available, but is not being managed as an open source project. Most changes are back-end work to improve stability of the code.</p> <p>(TS) It would be good for LYRASIS to run an EZID-like service.</p> <p>(KE) We have made a proposal that LYRASIS do this and there is interest. They just started a DOI service, so have limited bandwidth to take on additional projects.</p>

	wikipedia page <ul style="list-style-type: none"> <li>◦ history section</li> <li>◦ rest of page</li> </ul>	<p>Peter has drafted a history section, and suggests that it should link back to a more in-depth history from an externally published source.</p> <p>More sections need to be worked on, and can be addressed incrementally over time.</p> <p>Peter was volunteered to take a first pass at copying in object-type-ARK-counts from the FAQ to the Wikipedia page.</p>
--	--	---

## Action items

- [Roxana Maurer](#) draft a Quick Start page
- [John Kunze](#) to add Roxana to googlegroup
- [John Kunze](#) see if Smithsonian would like to present at DLF
- [Bertrand Caron](#) to work with [John Kunze](#) on wikipedia page
- [Tracy Seneca](#) to contact LYRASIS about need for ARK service
- [Tracy Seneca](#) to think about how to reach out to developers listed in the arks.org/resources page
- [John Kunze](#) reach out to <https://tanc-ahrc.github.io/PIDResources/PID%20functionalities.html> list ARK info, changing n2t.net-based docs to arks.org-based docs
- [Peter Sachs Collopy](#) to copy object-type-ARK-counts from the FAQ to the Wikipedia page
