

# 2021-06-01 - VIVO Development IG

## Date

01 Jun 2021

## Call-in Information

Time: 11:00 am, Eastern Time (New York, GMT-04:00)

To join the online meeting:

- Go to: <https://lyrasis.zoom.us/my/vivo1?pwd=a2Q3RUVKVkN2dkNHV3FUaFRtLzhGdz09>
  - Passcode: 351860
- One tap mobile:
  - US: +16699006833,,9358074182# or +19292056099,,9358074182#
- Or Telephone:
  - US: +1 669 900 6833 or +1 929 205 6099 or 877 853 5257
  - Meeting ID: 935 807 4182
- International numbers available: <https://zoom.us/j/aeANHanzED>

## Slack

- <https://vivo-project.slack.com>
  - Self-register at: <http://bit.ly/vivo-slack>

## Attendees

★ Indicating note-taker

1. [Brian Lowe](#)
2. [Benjamin Kampe](#)
3. [Georgy Litvinov](#)
4. [Michel Héon](#)
5. [William Welling](#)
6. [Benjamin Gross](#) ★
7. [Ralph O'Flinn](#)
8. [Don Elsborg](#)

## Agenda

1. Announcements / updates
2. Mailing list / Slack discussion
3. RC1 issues to resolve:

4. type	key	summary	assignee	reporter	priority	status	resolution	created	updated	due
---------	-----	---------	----------	----------	----------	--------	------------	---------	---------	-----

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

5. Testing / results: [Release Testing - 1.12.0](#)
6. VIVO WCAG 2 A/AA accessibility audit results from Deque
7. Updates on Data Ingest Task Force discussions
8. Prioritizing and planning post-1.12 development
  - a. <https://docs.google.com/spreadsheets/d/103P9P4v6yUBSb5BnVaK40NoGx1fIYyL8uaHKUubZWbE/edit?usp=sharing>

4. Other topics

## Future topics

1. Forward-looking topics:
  - a. frameworks: Spring / Spring Boot / alternatives
  - b. Horizontal scalability

- c. Deployment
- d. Configuration : files / environment variables / GUI settings
- e. Editing / form handling
- f. Adding custom theming without customizing build
- 2. Post-release priorities
  - a. Ingest / Kafka
  - b. Advanced Role Management
  - c. Moving Scholars closer to core - [next steps](#)
- 3. [Vitro JMS messaging approaches](#) - redux
  - a. Which architectural pattern should we take?
  - b. ~~What should the body of the messages be~~
- 4. Incremental

- a.
- b. Unable to locate Jira server for this macro. It may be due to Application Link configuration.
- c.

## Tickets

1. Status of In-Review tickets

type	key	summary	assignee	reporter	priority	status	resolution	created	updated	due
Unable to locate Jira server for this macro. It may be due to Application Link configuration.										

## Notes

[Draft notes on Google Drive](#)

1. Were hoping for release on Friday, but additional issues came up.
  - a. Thanks to Georgy and Benjamin K for effort resolving issues
  - b. Linger issues, might still be a couple blockers but should be resolved by this week
  - c. VIVO-1994- Behavior of manage publications functionality backwards when operating in French.
    - i. Text is misleading. Text says 'display the conferences' but the functionality actually is for 'hiding' the selected publications.
  - d. VIVO-1993- Publication count shows for sparkline, but no graph
    - i. Does not seem to be consistent.
    - ii. Seems to affect newly created persons, but not older
    - iii. Brian - there was a previous fix for the google sparkline location
    - iv. For reference: <https://jira.lyrasis.org/browse/VIVO-1950>
    - v. Benjamin G - would be helpful if we could see if there is any error being thrown by the google viz library or if it is failing silently.
  - e. VIVO-1992- UMLS search not working
    - i. Legacy issue for setting this up: <https://jira.lyrasis.org/browse/VIVO-1534>
    - ii. Hopefully the search is still working... but we don't know anybody actually being able to set it up and use it
    - iii. Brian - in the custom form generator for this page there is a list of the services. We could add a property to runtime.properties to turn UMLS off so it doesn't appear if it isn't set up correctly.
    - iv. Benjamin - can we actually set up the username and password setup in runtime.properties instead of just having a flag for the generator template?
    - v. Brian - that's actually more difficult than it would seem since the UMLS doesn't use the context.
    - vi. Don - We are using MeSH terms pulled out of Elements.
    - vii. Leaning toward middle option where we add option to hide the service (and issue) but not actually fix the issue.
  - f. <https://jira.lyrasis.org/browse/VIVO-1991>
    - i. Security issue in past couple versions of VIVO
    - ii. Difference between how md5 and argon hashes work
    - iii. Hash could be guessed in past
    - iv. A little tricky to test since smtp server needs to be set up
    - v. Brian can set up with gmail and test
    - vi. Georgy had set up a postfix server locally before (see <https://gist.github.com/haccks/7ec2fe500332a6d23ee68d1c1a2279d5>)
  - g. <https://jira.lyrasis.org/browse/VIVO-1990>
  - h. <https://jira.lyrasis.org/browse/VIVO-1989>
    - i. Brian discovered while testing other issues
    - ii. End up with a redirect issue if you aren't running VIVO at root context
    - iii. Should be a simple test
    - iv. Okay for a single review and merge
    - v. Benjamin G will test

- i. <https://jira.lyrasis.org/browse/VIVO-1988>
  - i. Unfortunately a little thornier than expected.
  - ii. We likely want to retain the functionality to delete label in 'all languages'
  - iii. But it should probably be documented.
  - iv. No loud objections and one thumbs up... will be pushed to 1.13
- j. <https://jira.lyrasis.org/browse/VIVO-1987>
  - i. Brian has been unable to reproduce
  - ii. Georgy - it always returns the first added language
  - iii. Not hard-coded to English
  - iv. If Brian set accept-language header in linked data request or via the dropdown, then he seemed to get the results he expected
  - v. We need to find specific steps to reproduce bug otherwise not a blocker
- k. <https://jira.lyrasis.org/browse/VIVO-1986>
  - i. Has approval
  - ii. Needs some committer attention
  - iii. Benjamin G will test
- l. <https://jira.lyrasis.org/browse/VIVO-1985>
  - i. Occured when you had multiple fallback languages but it was inconsistent between what was shown in view mode and what it was trying to edit.
  - ii. We probably want to reconsider a better priority mechanism for fallback languages.
  - iii. Can anybody take a look.....? "crickets"
- m. <https://jira.lyrasis.org/browse/VIVO-1984>
  - i. Brian could not reproduce
  - ii. Michel will retry to confirm
- n. <https://jira.lyrasis.org/browse/VIVO-1983>
  - i. We talked a lot about this last week.
  - ii. Led to same error as 1985.
  - iii. PR makes behavior consistent with other forms
  - iv. Will just see label for current language now (or insert new label) unless you've ingested data where there are multiple labels in a single language
  - v. Should be a fairly quick one to test
- o. Michel has a new ticket
  - i. Installer - condition to adding a new language is all source code must be in installation
  - ii. Cannot only download via Maven, must clone repo
  - iii. It would be nice if we had an option to clone *all* repositories easily.
  - iv. Brian - the wrinkle is the behavior for VIVO/Vitro doesn't match what the language repos does.
  - v. Michel will create a new issue to describe issue
- p. Georgy - will there be another meeting Friday?
  - i. Brian - if committers meet tomorrow we should hopefully rally and get things merged
  - ii. If there's still more to do a Friday meeting might be necessary.
  - iii. Stay tuned!
