Notes

- Announcements
    - Barring no changes release by June 18th
    - Migration workshop in a few weeks
- Migration-Utils slowdown
    - Still waiting on prometheus/grafana access
- Release Testing
    - People can pick up tests as they have time, would be good to have them for release
    - Might add migration tests to verify those as well
- Release Updates
- Tickets
    - Non-critical issues, but would be good to get in
    - FCREPO-3678 - Tomcat configuration needs to be documented for the RemoteIpValve
    - FCREPO-3620 - Should be resolved before cutting the release of the import-export-utility
- Camel Toolbox
    - Should be done soon
- Fedora 5
    - Modeshape artifacts pushed to sonatype
    - Modeshape release ready to be published, Fedora release will follow after
- Things to prioritize post Fedora 6 release?
    - OAI-PMH? Fixity?

Actions

- Look through migration util commits since December to see if there are any potential causes of performance drop off.
- cut the release candidate today
- Calvin will adjust the prometheus.yml targets line to point at the localhost fedora on port 8080 to run the metric on prometheus docker compose
