Notes

Reminders

- Send Lynette editor details (your name, institution, OrcId)
- Instructions for editing documents are in [README](#) in GitHub

Date

- startDate - specifies the moment the activity began or is scheduled to begin
- endDate - specifies the moment the activity concluded or is expected to concluded
- published - date and time at which the object was published
- updated - date and time at which the object was updated
- deleted - timestamp for when the object was deleted (requires Tombstone object)

published, updated, deleted - datetime stamp about when something happens in the stream

startDate, endDate - seem like they relate to the source dataset

How are changesets handled?

LOC

- Purpose: notifications of change
- Hit the feed, inspect the date, go back to point where you last synced.

Future Topics

- *Notification to a single institution when a requested entity that was missing becomes available. This will likely be outside the main change management stream.*
- *Value of diagramming to express changes as a means of conveying information around where data is being produced, where it goes, etc.*
- *Partial splits and partial merges.*
