

Community Management

The community is the primary storage level in the DSpace's storage hierarchy that holds sub-community and collections. This document provides an overview of creating, editing, and deleting a community. The documentation below assumes that the user has the relevant authorizations. For example, the admin menu and edit buttons would appear to a user having community administration permission.

If you're unsure about community administration permissions assigned to your account for the target community, contact your system administrator.
