Meeting Notes

- 1.8.0/1.7.1 Release Planning & Schedules, Documentation Mgmt, JIRA review
 - Reviewed JIRA Issues ended with issue DS-658
 - 1.7.1 Schedule & Coordinator
 - o Peter Dietz volunteered to coordinate 1.7.1
 - o 1.7.1 will be a bug-fix only release
 - Code should go into 1.7.x Branch
 - 1.8.0 Schedule & Coordinator
 - O Still need a volunteer to Coordinate
 - Two potential schedules proposed:
 - #1 Release in 9mos (Sept) see above
 - #2 Release in 10mos (Oct)
 - o Many seem to think 12mos release schedule after that is better. So, we would potentially standardize to always release in the Fall.
 - Most seem to like the ideas of several "beta" releases before feature freeze.
 - Some discussion of Documentation process
 - We need a Documentation Team Jeff cannot do this alone
 - The wiki is working well, but we need a group to keep us "honest". At the end of the 1.7.0 release, there was a scramble to fix docs issues, because of a lack of pre-planning & no team to double check things as we went along.
 - o Ideas/proposals on improving Documentation process are welcome.
