JMeter notes

Best Practices:

- JMeter page

Tools for integration

- Maven plugin
- Bamboo plugin

Resources for running scaled tests

- Cloud instances?
-

Test plan development

- In the source itself, e.g. https://github.com/ajs6f/fcrepo/tree/jmeter-maven/fcrepo-integrationtest/fcrepo-integrationtest-jmeter
- Available as separate resources?

Interpreting results

- What can JMeter's reporting tell us?
    - https://wiki.apache.org/jmeter/LogAnalysis
    - https://code.google.com/p/jmeter-plugins/
    - http://loadosophia.org/
    -
- What can we discover as patterns in JMeter's raw output?
- How can we integrate JMeter's output and reporting with other information (from Maven Surefire, Bamboo plugins, etc.)
