

# DevMtg 2012-02-08

## Developers Meeting on Weds, February 8, 2012

### Agenda

#### Regular Items

1. [JIRA Catch-Up](#) – starting with issue DS-943
  - [Search for all Unresolved Issues \(since DS-943\)](#)

#### Discussion Topics

1. Quick Announcement: [DuraSpace's Bamboo server](#) may be offline tomorrow & Friday. We're working to migrate over to latest version.
2. Tim's proposal for a (small?) 1.8.2 Release. Unfortunately discovered several annoying issues in AIP Backup & Restore that could use fixing:
  - [DS-1120 : AIP Backup & Restore : SITE AIP has a different checksum everytime when orphaned Collection/Community groups exist](#)
  - [DS-1108 : AIP Backup & Restore doesn't restore a Bitstream's "Sequence ID"](#)
3. Thoughts on a "DSpace Developers Virtual Summit" Week? (potential weeks include Feb 20-24, Feb 27-Mar 2)
  - Summit would consist of a daily video/voice chat meeting (1-2 hrs likely, via Google+?) between developers/committers
  - Open format discussion, but seeded with a few larger/provocative questions
    - Example question: "How do we move the DSpace API forward to better support multiple UIs, potential new UI development, & avoid UI logic duplication?"
  - Tim would attend each day, but rest of folks would likely be rotating in/out based on their schedules (limit of 10 simultaneous attendees, based on Google+ limitations).
  - Each day we'd publicly post (to dspace-devel list) a summary of that day's discussions. This would allow others to provide comments /feedback & to encourage others to join in following days
  - At end of summit, if things went well, it may or may not be followed up by a "Virtual Hack-a-thon" (week or two) to rapidly prototype/build any new projects that were brainstormed.
4. [Google Summer of Code 2012](#) - Begin to think about possible GSoC DSpace Project Ideas. Also, think about whether you'd be willing to mentor a student project (of your choice, obviously).
5. Other topics?

#### Additional Ongoing Topics

1. Brainstorming Features/Changes for 3.0. Can we work towards development teams around any of these projects?
  - Larger DSpace projects which seem to have a lot of recent support:
    - Moving towards a Common "Business Logic" / Business Services API. (I.e. avoiding duplication of business logic in all UIs)
    - [Metadata For All](#) (i.e. metadata on all objects), SubTopic: Getting us up-to-date how we use Dublin Core / DCMI. (Support from DCAT)
  - Other DSpace projects receiving mention recently
    - [Migrate Search and Browse to DSpace Discovery](#)
    - "Change which UIs come out-of-the-box" (and which are optionally installed later)
    - [Move configurations to DB or similar](#) (so they can be managed/edited from Admin UI)
    - [Context Guided Ingest](#) (or Item Type based submissions)
    - Other [Development Proposals](#)

### Individual Status Updates

*If you have status items to report, please enter them below at least 1 hour before the meeting starts.*

### Meeting Notes

JIRA Reviews, 1.8.2 will be released Feb 24, Virtual Summit Feb 27-Mar 2

### Meeting Transcript

- Full IRC Transcript is available at - <http://irclogs.duraspace.org/index.php?date=2012-02-08>

### Action Items

*Action items coming out of this meeting go here, if any.*

- TODO - Update the [ReleaseCoordinating](#) page to better outline Release Processes
  - Add "Update this document with lessons learned" as the final task of any release.
