Adam: One new item - request for new Client published to Maven

Adam: Focus on 3.6, Release in June so just the key issues.

Adam: Very important servlet filter refactoring.

Adam: GSOC code integration done and committed.

Adam: And merged.

Ben: Shows up to answer question - Yes its done.

Adam: Need Eddie to check if OK.

Ben: Other big issue is replacing Jersey for REST API

Ben: Its in master. There was a problem with the POM for Jersey.

Ben: Push fix to FCREPO-787 to master today.

Ben: Wants to do Greg Jansen pull request problem.

<barmintor> Greg Jansen Pull Request = FCREPO-1020

Ben: On 3.5 branch so no automatic merge, also has two new features that need to be dealt with particularly FESL filter.

Ben: The other is the bug fix itself.

Adam: Greg is easy to contact and may be willing help separate the features.

Ben: Need to cherry pick since there are other conflicting changes.

Adam: Ben: Not an automatic merge but is feasible with help.

Frank: FCREPO-1023 report

<barmintor> https://bamboo.duraspace.org/browse/FCREPO-CORE

<kompewter> [Fedora - Core Test: Plan Summary - DuraSpace Bamboo] - https://bamboo.duraspace.org/browse/FCREPO-CORE

Frank: FCREPO-1027 not done yet but will try to get to it soon.

Frank: FCREPO-1023 ready for review.

Adam: Looking for reviewer, Maybe Ben if time available otherwise Adam.

Adam: It looks like we covered the issues, now we need to do the testing.

Ben: Question - If the managed project initiative goes forward, there will likely be documents - Should they be in a Fedora repo?

<barmintor> revised 3.6 Remaining Feature/Fix List: FCREPO-787, FCREPO-893, FCREPO-1020

<ajs6f> Also FCREPO-893

<ajs6f> Oh, wait, that's already there.

<barmintor> but it's important enough that we should repeat it for emphasis 😉

Dan: We will need to check with Chris but two repos in the cloud, a production one for docs and the result of a build for testing.
