

Metadata enhancement work or proposals summary

This is a summary page of the metadata projects/priorities identified by the [October 2011 community survey on improving metadata support](#) authored by the [DSpace Community Advisory Team](#) at the request of the [DSpace Committers/Developers](#). DCAT has summarized and interpreted the information gathered from the survey estimated level of effort required. DSpace community members should feel free to add more detailed explanation/examples to further flesh out the changes/requirements they would like to see. It is recommended that a community project team be formed around this work.

- [Updating the Qualified Dublin Core registry in DSpace to the latest standards of the DCMI](#)
- [Standardizing the default namespaces](#)
- [Adding metadata authority controls/vocabularies to the data model](#)
- [Moving metadata related configurations from dspace.cfg to the database](#)
- [Develop support for additional metadata standards \(use the "Other" field to specify which standards\)](#)
- [Improved \(or more transparent\) flexibility](#)
- [Enhancing the metadata available for Communities, Collections and Files \(bitstreams\)](#)
