

DevMtg 2012-10-10

Developers Meeting on Weds, October 10, 2012

Agenda

Regular Items

- ~~JIRA Reviews~~ — starting with issue ~~DS-1082~~
 - ~~Search for all Unresolved Issues (since DS-1082)~~
- Forgoing JIRA review for now to spend time on 3.0 & Testathon. Specific JIRA tickets can be brought up as needed.

Discussion Topics

1. **3.0 Release** Testathon
 - a. Any last things to clean up or take care of?
 - b. SourceForge – should we still put release downloads up on SourceForge
 - i. Pros: Sourceforge provides [nice download stats/charts](#). GitHub doesn't (the best GitHub can do is give you a grand total).
 1. Also, it seems like there's no easy way to tell folks who find DSpace on SourceForge that the latest releases can be downloaded over on GitHub.
 - ii. Cons: It's another place to post releases to.
 - c. **DS-1277** : helix84 has suggested to have <http://demo.dspace.org/> feedback form send to a **different** JIRA project. Thoughts? Alternatives?
2. Other topics?

Additional Ongoing Topics

1. How can we "catch up" with JIRA Backlog?
 - Do we need to "split up" the tickets & do quick reviews on our own? Or perhaps just split up tickets & do a very quick ranking & schedule ones with patches for 3.0?
 - Perhaps we schedule a "JIRA Backlog Bash" event (via IRC or similar) where we work together to decrease the backlog over a few days or a week (think of this like a "Test-a-thon" but instead we'd be working to just clear out the backlog as best we can).
2. Brainstorming Features/Changes for future. Can we work towards development teams around any of these projects?
 - Larger DSpace projects which seem to have a lot of recent support:
 - Moving towards a Common "Business Logic" / Business Services API. (I.e. avoiding duplication of business logic in all UIs)
 - [Metadata For All](#) (i.e. metadata on all objects), SubTopic: Getting us up-to-date how we use Dublin Core / DCMI. (Support from DCAT)
 - AuthN & AuthZ issues, including: [DS-994](#), [DS-1006](#), [DS-1007](#), [DS-1088](#), and developer meeting on [May 2, 2012](#)
 - Other DSpace projects receiving mention recently
 - [Migrate Search and Browse to DSpace Discovery](#)
 - "Change which UIs come out-of-the-box" (and which are optionally installed later)
 - [Move configurations to DB or similar](#) (so they can be managed/edited from Admin UI)
 - [Context Guided Ingest](#) (or Item Type based submissions)
 - Other [Development Proposals](#)

Individual Status Updates

If you have status items to report, please enter them below at least 1 hour before the meeting starts.

Meeting Notes

Meeting Transcript
