

2011-06-02 Development Leads Call

Conference poster and paper presentations likely to be submitted by Yesterday (2011-06-01)

Updates

- Attending institution updates
- Maintenance release for 1.2

Demo(s)

- New feature / visualization examples?

Issue References

- <http://issues.library.cornell.edu/browse/VIVOHARV-68> Missing author on authorship tags
- <http://issues.library.cornell.edu/browse/VIVOHARV-69> MODS Harvest VIVO error
- <http://issues.library.cornell.edu/browse/VIVOFEEED-926> Index rebuild not showing results

Concerns / Requests

- Ability to weight search results for determining the position of results.
 - Is it related to the "customize listing of related role" emails from Eliza and Rebecca ?

Meeting Minutes

Updates:

1. Cornell maintenance build
 - a. Vivo Cornell is using the maintenance build.
 - b. It has no blockers.
 - c. They are making a release
 - d. VIVO 1.2 --> 1.2.1 to be available.
 - i. No migration needed
 - ii. No ontology changes
 - iii. Realistically, just a patch
2. Alex Viggio from Boulder CO.
 - a. They are running a Faculty preview.
 - i. Using a VPN for connection
 - ii. Pulled in data from a source
 - b. They are running it as a beta
 - i. Planning on being out by the end of the summer
 - c. The system is from 1995 and built on Oracle
 - d. Integrating a VIVO with RNS profiles.
3. Anurag Shanker from IU
 - a. Have come up with a strategy for Joomla
 - i. A VIVO expansion with SPARQL queries
 1. Prepackaged queries
 2. A query builder
 - ii. Submitted a paper for a poster about semantic queries.

Demo:

1. Micah
 - a. Showed Map of Science progress
 - b. They are trying to improve the mapping percent
 - i. Cornell and UF have a list of Journals in the map
 - c. It is located in the trunk within Subversion
 - i. Enabled by default
 - ii. May become a switch in 1.3 determined by stability

Issues:

1. VIVOHARV-68 (missing authorship tags)
 - a. Corporate author labels missing first name and last name
 - b. Should contact Stella Mitchell or Brian Lowe about Ontology
2. VIVOHARV-69 (MODS Harvest VIVO error)
 - a. Mike Barbieri will investigate
3. VIVOFEEED-926 (Index Rebuild not showing Results)
 - a. There is a lock file in the Lucene index folder.
 - b. Suspect the harvested data is missing the model listeners.

Concerns:

1. VIVO 1.3 features a weighting of search results based on connections between individuals.
 - a. rdfs:label, first name, and last name could be preferred fields in the ranking.

There will be a code freeze for 1.3 at the end of June, and a release near July 15th

Nick Skaggs gave an update about his recent trip to the NIH.

- There is a person there trying to get an agency within NIH to begin using VIVO
- There are ontological questions forthcoming

How to hide an individual? Currently only by removing them.

Sourceforge isn't showing some familiar buttons. To be investigated.
