

Managing Page Objects

You can access page-level management options by clicking the 'Pages' tab and then clicking the thumbnail for the page you want to manage.

The screenshot shows the Islandora Downloadable VM interface. At the top, there is a header with 'Islandora Downloadable VM' and 'Islandora Virtual Environment'. Below this is a navigation bar with 'Digital Repository' and 'DIY Interface' tabs. A red box with an arrow points to the 'Pages' tab, with the text 'Click the 'Pages' tab'. Below the navigation bar, there is a breadcrumb trail: 'Home > Digital repository > Book Collection'. The main content area is titled 'Elmsdale'. Below the title, there is a row of tabs: 'Description', 'Pages', 'Read', 'Purge all pages', 'Manage This Book', and 'Object Details'. The 'Pages' tab is selected. Below the tabs, there is a pagination control showing '1-20 of 24' and a 'Next>' link. Below the pagination control, there are four page thumbnails. The first thumbnail is labeled 'Elmsdale - Page 001'. The second thumbnail is labeled 'Elmsdale - Page 002'. The third thumbnail is labeled 'Elmsdale - Page 003'. The fourth thumbnail is labeled 'Elmsdale - Page 004'. A red box with an arrow points to the third thumbnail, with the text 'Click a page thumbnail to view page management functions'.

The Page Management Tab

You can access the page management functions by clicking the 'Manage This Page Object' tab.

The screenshot displays the Islandora Downloadable VM interface. At the top, the header reads "Islandora Downloadable VM" and "Islandora Virtual Environment". A "Logout" button is in the top right corner. Below the header is a navigation bar with tabs: "Digital Repository", "DIY Interface", and "Create content". A breadcrumb trail shows the path: "Home > Digital repository > Book Collection > Elmsdale > Elmsdale - Page 003". The main heading is "Elmsdale - Page 003". Below this, there are two tabs: "Page Content Model" and "Manage This Page Object". A red arrow points from a callout box to the "Manage This Page Object" tab. The callout box contains the text: "Click here to view the page management options". Below the tabs, a list of management options is shown, each with a right-pointing arrow:

- ▶ View Metadata
- ▶ Update Derived Datastreams
- ▶ Manage Current Datastreams
- ▶ Add Additional Datastreams
- ▶ Permanently Delete this page

View Metadata

This fieldset displays the page-level DC metadata (in most cases this will be fairly sparse).

Update Derived Datastreams

This function allows you to refresh one or more of the Datastreams associated with the page.

The screenshot shows the Islandora Downloadable VM interface. At the top, there's a header with 'Islandora Downloadable VM' and 'Islandora Virtual Environment'. Below this is a navigation bar with tabs: 'Digital Repository', 'DIY Interface', 'Create content', and 'Administer'. A breadcrumb trail reads: 'Home > Digital repository > Book Collection > Elmsdale > Elmsdale - Page 003 > Elmsdale - Page 003'. The main title is 'Elmsdale - Page 003'. Below the title are two tabs: 'Page Content Model' and 'Manage This Page Object'. The 'Manage This Page Object' tab is active. Under this tab, there are several sections: 'View Metadata', 'Update Derived Datastreams' (which includes a description and two checkboxes: 'Refresh OCR for this page' and 'Refresh all derived images', followed by an 'Update Page Datastreams' button), 'Manage Current Datastreams', 'Add Additional Datastreams', and 'Permanently Delete this page'.

- **Refresh OCR for this page:** If OCR failed on ingest, or if you change your OCR process, you can redo the OCR for this page.
- **Refresh all derived images:** You may need to regenerate the derivative images that get created on ingest - you can do so with this option.

Manage Current Datastreams

Here you can replace or purge one or more Datastreams for the page object.

▼ Manage Current Datastreams

All Datastreams

Dublin Core Record for this object	View	Download	text/xml	
Fedora Object-to-Object Relationship Metadata	View	Download	text/xml	
Archival TIFF	View	Download	image/tiff	
Compressed JP2	View	Download	image/jp2	
Thumbnail	View	Download	image/jpeg	
JPEG image	View	Download	image/jpeg	
Scanned Text	View	Download	text/plain	

Add Additional Datastreams

You may want to manually add a Datastream that didn't get created on ingest. You can do so by using this function.

▼ Add Additional Datastreams

Add Datastream:

Datastream ID:

Datastream IDs defined by the content model.

Datastream Label: *

A Human readable label

Upload Document:

No file chosen

The file to upload.

Choose a DSID
(this must be
specified in the
content model)

Enter a human-
readable label

Browse for the file

Permanently Delete This Page

You can purge this page while leaving the rest of the book intact. You will be asked to confirm your choice before the page is purged.

▼ Permanently Delete this page

Clicking this button will delete this page.
This action cannot be undone.

▼ Are you sure?

Clicking the delete button will permanently remove this page.
This action cannot be undone.
