

Fedora KnowledgeBase

KnowledgeBase is a framework designed to help users become immediately productive with DuraSpace technologies. The initial content focuses on how to set up and run a repository using either DSpace or Fedora. The material contained here is not a duplication or replacement for the official software documentation, but a supplemental resource, including dynamic content delivered via the text guide, screencasts, webinar recordings, etc. KnowledgeBase is a collaboration among DuraSpace, the not-for-profit supporting DSpace and Fedora, developers, service providers and user communities. If you are interested in helping with KnowledgeBase or have feedback/questions, please contact Valorie Hollister at vhollister@duraspace.org.

Before getting started, learn some Fedora basics:

- [The Fedora Basics](#) - *a quick Fedora overview*
- [See examples](#) - *Fedora repositories in action*
- [Watch a video](#) - *Fedora community stories about access and management*
- [Fedora FAQs](#) - *get answers to common questions*

Get started with Fedora KnowledgeBase:

- [Introduction to Fedora](#)
- [Installation & Set-Up](#)
- [Core Interfaces & Integrations](#)
- [Fedora Administration](#)
- [Applications Built on Fedora](#)
