

Dspace Batch Installer for Window

This running DSpace with Window Installer scripts has originally written by Bharat M. Chaudhari (DSpace Ambassador)-India. And has tested in Microsoft Window XP version 2002 service pack 2 with PROCESSOR_ARCHITECTURE x86 32bytes

The limiting factor to adopt Dspace has ever been the difficulty in Installing DSpace. And as we know that installation and configuration of the prerequisites that are usually time consuming and difficult with any operating system Linux, MAC or Window. This work has been meant for making Dspace a handy software and saving time of setting Environmental Variables, running window command line. Anyone with slightest knowledge of computer can also run Dspace with simple steps.

Here your DSpace Installer will work completely offline (no need to get connected with internet)

DSpace batch installer package consists of following files:

jdk-6u31-windows-i586, postgresql-9.1.3-1-windows, Apache Ant 1.8.3, DSpace-1.8.2, ApacheTomcat1.7.28 and Window batch files with Run Me.html- Dspace navigation file with installation steps.
