

Structure - Associate Separate Properties with Each DSpace Community

Title (Goal)	Structure - Associate Separate Properties with Each DSpace Community
Primary Actor	System
Scope	
Level	
Story (A paragraph or two describing what happens)	Be able to attach generic configuration properties to any DSpace Object. Properties should be able to be used anywhere in DSpace for controlling user experience. Examples of Configurable Options: • Repository Manager Configure theming template used in DSpace Community / Collection • Repository Manager Configure Theming overrides (header, footer, navigation) for individual communities. • Repository Manager Configure Authentication methods that will be active for system and for specific communities • Repository Manager Select Submission process used for Collection • Repository Manager Select Steps that may be used during submission process.
