# Structure - Manage Lists, Controlled Vocabularies and Authority Control

| Title (Goal) | Structure - Manage Lists, Controlled Vocabularies and Authority Control |
| --- | --- |
| Primary Actor | System \| Human |
| Scope | |
| Level | |
| Story (A paragraph or two describing what happens) | Users should be able to manage Authority Control data without restarting or rebuilding DSpace. Authority Control sources includes input-forms lists, hierarchical vocabularies, external sources and dspace metadata fields). DSpace specific Authorities should be able to be managed from a common user interface (similar to Metadata and Format Registries) and/or import format. |
