Admin UI - Basic Preservation - Format validation

Title (Goal)	Basic Preservation - Format validation
Primary Actor	Admin
Scope	
Level	
Story (A paragraph or two describing what happens)	Admin wants to validate formats for digital objects in the repository. • Admin has object that purports to be of format F; is it? • Admin has an object of format F; does it meet profile P of F? • Admin has an object of format F and external metadata about F in schema S; are they consistent?
