

# 2014-05-22 - Fedora Committer Meeting

## Time/Place

This meeting is a hybrid teleconference and IRC chat. Anyone is welcome to join...here's the info:

- Time: [11:00am Eastern Daylight Time US \(UTC-4\)](#)
- U.S.A/Canada toll free: 866-740-1260, participant code: 2257295
- International toll free: <http://www.readytalk.com/intl>
  - Use the above link and input 2257295 and the country you are calling from to get your country's toll-free dial-in number
  - Once on the call, enter participant code 2257295
- IRC:
  - [Join the #duraspace-ff chat room via Freenode Web IRC](#) (enter a unique nick)
  - Or point your IRC client to #duraspace-ff on [irc.freenode.net](http://irc.freenode.net)

## Attendees

- [Michael Durbin](#)
- [David Wilcox](#)
- [Andrew Woods](#)
- [Longshou Situ](#)
- [Osman Din](#)
- [Kevin S. Clarke](#)
- [Eric James](#)
- [Greg Jansen](#) ★
- [Unknown User \(escowles@ucsd.edu\)](mailto:escowles@ucsd.edu)

## Agenda

1. Beta release sanity testing
2. ...

## Minutes

### Beta Release (Andrew)

- schedule solid RC or beta to be ready for Open Repositories
- vast majority of features are finished and ready for testing
- when we put out the beta or the RC of the beta, committers expected to download the quickstart and try some minimal sanity testing
- Andrew will put out a release candidate for input at the end of the current sprint
- Next sprint will focus on fixing anything wrong with the beta, doing additional testing
- Mike D: we need a box we can check to show that we have done a sanity test, some kind of affirmative to say we tested
- Coverage of platforms will be helpful (Mac, Win, Linux)
- Sign off on high level features or recipes would be great (triple store recipe, authorization)
- Mike D: volunteered to assist on building the release with Andrew
- Esme re-tested the REST API
  - renewing transactions did not seem to work, so that was the only real fix
  - most fixes were error handling
- Balanced tree for performance
  - Kevin: native store testing remains for the weekend (don't worry about indexing at this point -Andrew)
  - Esme: balanced tree testing continues and is documented on the wiki (256x256x256 folders)
  - Do we need to test scenarios with more than 15 mil right now? David: eventually but not right now.
  - Esme will continue testing at XX level
- Mike: questions about making read only file-system useful
  - one pull request pending - checksum caching (regenerate checksum 3 times, were querying wrong property)
  - cache timeout (for changing file system)
  - where to put the sidecar files (or database/modeshape equivalent) is still a question.
  - Mike: will start with an easy solution to read only checksum, later we can come up with better storage.

### XACML

- there are some issue appearing here, but they seem resolved
- Scott: updating the PR to include fixes
- additional documentation seems like what remain

### Stand Up

Esme

- has a couple error handling and transaction renewal fix

- will make changes to the wiki about the error handling (once internet restored)
- will test a larger balanced tree of objects
- will repeat holiday performance testing
- Andrew: keep in mind that external datastreams story/recipe is needed

Andrew

- Chris B. has created a bunch of bug in pivotal, these can be looked at

Longshou

- Latest update is showing correct information on the HTML UI
- What issues remain?
- Andrew will build the latest and see if he has any new issues.
- Having so branching issues, worried about losing commits.
- Andrew had one comment on an interface. Longshou: it is probably safe to remove the code in question.
- Will follow up on the get children method..

## Actions
