

2014-08-20 - Fedora Technical WG Meeting

Time/Place

- Time: [12:00pm Eastern Daylight Time US \(UTC-4\)](#)
- Place: Google-hangout, https://plus.google.com/hangouts/_/event/c1glu6soq43r1rr6ou17qtobug8

Attendees

- Andrew Woods
- Esme Cowles
- Chris Beer ★
- ~~Daniel Davis~~ *
- ~~Declan Fleming~~
- A. Soroka
- ~~Benjamin Armiter~~
- Zhiwu Xie
- Neil Jefferies (having issues with my data connection - may not be in the call if I can't fix it!)
- Yinlin Chen

Note-taker = ★

Previous note-taker = *

Agenda

1. Review of [areas of assessment](#)
Action Item: Enhance descriptions of different areas (particularly 6, 7, and 8)
2. [Architecture](#) walk-through
Notes as comments on the wiki page.
3. Review to-date [performance testing summary](#)
4. Assign owners to (some number of) areas of assessment
5. Thought exercise: "What would be the technical "risks" of releasing 4.0 Production *now*"?
 - a. Or another way, "Where do we want to put next sprint's dev energy"?

Discussion

- Architecture walk-through
 - Message-emitter should be added to F4 diagram
 - Do we need two diagrams? - no
 - as implemented
 - aspirational
 - It would be beneficial to define ci-tests
- There was interest in testing how to extend the code
- Next meeting: Wed meeting next week 8/27 at noon ET

Actions

- ✓ Esme to investigate current ModeShape development roadmap and how it aligns with F4
 - clustering, etc
- ~~Adam and Ben to assess REST API (goal of versioning this API)~~
- ✓ Dan to enhance descriptions of "[Areas of Assessment](#)" numbers 6, 7, and 8
- ~~Neil to define initial set of system CI tests~~
