

# DevMtg 2015-02-11

## Developers Meeting on Weds, Feb 11, 2015

Today's Meeting Times

- JIRA Backlog Hour: **16:00 UTC** in #dspace IRC, i.e. one hour AFTER the meeting. During that hour, we will be working together to tackle our [JIRA Backlog of "Received" tickets](#).
- DSpace Developers Meeting: **15:00 UTC** in #duraspace IRC

## Agenda

### Discussion Topics

1. [DSpace 5](#)
  - a. Unable to locate Jira server for this macro. It may be due to Application Link configuration.
2. [Google S](#)
3. Other top
  - a. Unable to locate Jira server for this macro. It may be due to Application Link configuration. Confirm that the separation
  - b. There are several nice package builders to support batch ingestion, but none in the box. Should we try to adopt one? Which one? What would be our selection criteria?

### Ongoing Discussions

- Looking beyond DSpace 5, what sort of UI(s) would we want for the future?
  1. The new [DSpace Steering Group](#) has noted that it seems unsustainable to maintain two UIs forever.
  2. Both our UIs are rather dated platforms (JSPUI = base code is 13+ years old, XMLUI = 7+ years old). There are lots of newer, easier to use Java and non-Java UI platforms.
  3. [Brainstorms on a Future UI](#) is the beginning of some very rough ideas of what UI platforms exist out there, and what is important to us in a UI. None of this is "set in stone", and it's all just a brainstorm on "If we had to choose again now, what do we feel is the best UI platform to help DSpace remain a relevant, vibrant project for 5-10 more years."

## Meeting Notes

### Meeting Transcript

- Full IRC Transcript is available at - <http://irclogs.duraspace.org/index.php?date=2015-02-11>

### Action Items

(Action items go here, if any)
