Sprint planning

03/03

- Nianli
  - Yesterday:
    - I was working on Unable to locate Jira server for this macro. It may be due to Application Link configuration. .
    - I deployed the wa
    - I did see the errors as report at first time. But I don't have performance issue on federated files. Details I will put in JIRA comments.
    - The interesting thing is the error gone after I turned the log to debug mode for fcrepo.log.http.api.
  - Today:
    - I will continue working on this JIRA issue.
  - Help/Blocker:
    - Please help on StreamingBaseHtmlProvider.java line 237, have error: Exception rendering #parse(views/common-metadata.vsl) at /views/node.vsl[line 37, column 13] . But use debug setting in logback.xml, error disappeared,

  - Yesterday:
    - test on Unable to locate Jira server for this macro. It may be due to Application Link configuration.
    - n Unable to locate Jira server for this macro. It may be due to Application Link configuration.
  - Today:

        - Will try to finish Unable to locate Jira server for this macro. It may be due to Application Link configuration. and start to look at o
    - Blocker:
        - I have some local work need to be done asap today, but I will make up some time tonight.
- Yinlin
    - Yesterday:
        - Work o
        - Finish Unable to locate Jira server for this macro. It may be due to Application Link configuration.
        - Submit
    - Today:
        - Unable to locate Jira server for this macro. It may be due to Application Link configuration. is not enough, I reduced the nullpoint error yesterday but it seems other variable still need to have in setup().
            - I will try directly using the setup in ContentRdfContextTest.java and continue working on it.
    - Blocker
        - My mac sometimes cannot build passed using mvn clean install.
        - Spent half day on this issue but still can't make it work.
        - It was build fine time from time, my assumption was memory issue or underline OSX update.
        - Post to IRC but seems no one have similar issues.
        - My work around for this issue was using another Ubuntu to build.
        - My department has agree to upgrade the memory so it should be fine then.
- Jared
    - Yesterday:
        - Finished (hopefully) Unable to locate Jira server for this macro. It may be due to Application Link configuration.
    - Today:
        - Working on Unable to locate Jira server for this macro. It may be due to Application Link configuration.
            - Ne
