Ongoing Discussions

- Looking beyond DSpace 5, what sort of UI(s) would we want for the future?
 1. The new [DSpace Steering Group](#) has noted that it seems unsustainable to maintain two UIs forever.
 2. Both our UIs are rather dated platforms (JSPUI = base code is 13+ years old, XMLUI = 7+ years old). There are lots of newer, easier to user Java and non-Java UI platforms.
 3. [Brainstorms on a Future UI](#) is the beginning of some very rough ideas of what UI platforms exist out there, and what is important to us in a UI. None of this is "set in stone", and it's all just a brainstorm on "If we had to choose again now, what do we feel is the best UI platform to help DSpace remain a relevant, vibrant project for 5-10 more years."
