

Structure - Format checking of data entry in input forms

Title (Goal)	Structure - Format checking of data entry in input forms
Primary Actor	End User Administrator
Scope	
Level	
Story (A paragraph or two describing what happens)	As a DSPACE admin I frequently get requests to correct mistyped meta-data or meta data that does not conform to a local standard. Some of these mistakes can be caught by adding a <code>format</code> property to the field definition in input-forms.xml • extent field in one form might be <code>'[0-9]* pages'</code> in another but <code>'[0-9]+ [KMGT]B'</code> • email should look like <code>_____@_____</code> — some wicked reg-exp
