

Setup Profiles

The initial dataset to load into the repository before testing proper begins.

| Parameter | Suggested values | Notes |
|---|------------------|---------------------------------------|
| Number of containers | Integer | |
| Average number of binaries per container | Integer | |
| Standard deviation of binary per container | | |
| Average size of binary | Integer | Average size of binary in bytes |
| Standard deviation of binary size | | |
| Average number of properties per resource | Integer | |
| Standard deviation of properties per resource | | |
| Is binary data random? | Yes, No | If "No", whence shall bytes be drawn? |
