

Feature Tour - Actions

On the right side of each page is a list of actions that can be performed for the [resource](#) at the current path.

These may include:

Create New Child Resource

From the homepage or any [container](#) page a form exists that lets you create a new container or [binary](#) that will be the child of the current container.

Download/Update Content

When viewing a [NonRdfSourceDescription](#) with [binary](#) content, click the large green button to download that content. You can also update the description of the binary using the form.

Update Properties

When viewing a [resource](#), you can add or delete properties using the "Update Properties" form.

Delete Resource

You can delete the resource you are currently viewing by clicking the red "Delete" button.

Import/Export

When viewing a [resource](#), you can export it using the "Export as..." button. In the case of [containers](#), you can also import a resource using the "Import" form.
