RESTful HTTP API - Backup and Restore

- POST fcr:backup Initiate a (consistent) backup of the repository
- POST fcr:restore Replace repository content with data from a backup directory

Request URI: /

Methods: GET, POST

POST fcr:backup Initiate a (consistent) backup of the repository

The backup will be stored in a temporary directory on the server. As yet, there is not a REST API method for retrieving the content of the backup.

Example:

```
curl -X POST "http://localhost:8080/rest/fcr:backup"
```

Response:

```
Status: 200 OK

Body:
/tmp/fcrepo4-data/path/to/backup/directory
```

Status:

200 OK

POST fcr:restore Replace repository content with data from a backup directory

Example:

```
curl -X POST --data-binary "/tmp/fcrepo4-data/path/to/backup/directory" "http://localhost:8080/rest/fcr:restore"
```

Response:

```
Status: 204 No Content
```

Status:

204 Backup restored

500 Error restoring backup
