

2016-05-19 - Fedora Tech Meeting

Time/Place

This meeting is a hybrid teleconference and IRC chat. Anyone is welcome to join...here's the info:

- Time: 11:00am Eastern Daylight Time US (UTC-4)
- Dial-in Number: (712) 775-7035
 - Participant Code: 479307#
 - International numbers: [Conference Call Information](#)
 - Web Access: <https://www.freeconferencecallhd.com/wp-content/themes/responsive/flashphone/flash-phone.php>
- IRC:
 - [Join the #fcrepo chat room via Freenode Web IRC](#) (enter a unique nick)
 - Or point your IRC client to #fcrepo on irc.freenode.net

Attendees

- [Jared Whiklo](#)
- [Nick Ruest](#) ★
- [Bethany Seeger](#)
- [Longshou Situ](#)
- [Unknown User \(acoburn\)](#)
- [A. Soroka](#)
- [Yinlin Chen](#)
- [Esmé Cowles](#)
- [Michael Durbin](#)
- [Kevin Ford](#)
- [Andrew Woods](#)
- [Peter Eichman](#)

Agenda

1. LevelDB [corruption issues](#) - potential [fix 4.1.1](#) (fcrepo-webapp-4.1.1-recovery.war)
2. Update on [Versioning Spec](#) - meeting [notes](#)
3. Fedora API GitHub repo(s)
 - a. Which GitHub organization? fcrepo? duraspace?
 - b. One or many repos?
 - c. Are the constituent parts of the API versioned separately?
4. Time to deprecate filesystem federation?
5. Time to move fcrepo-message-consumer out of fcrepo4-exts?
6. Review of: <https://github.com/fcrepo4/ontology/pull/37>
7. [ModeShape5](#) update
8. Repository configuration (e.g. repository.json): should this be standardized in any way or do different Fedora implementations use whatever configuration style/content that makes sense for the implementation?
9. Logging [recommendations](#) and [style-guide](#)
10. ...
11. Status of "in-flight" tickets

key	summary	type	created	updated	due	assignee	reporter	priority	status	resolution
-----	---------	------	---------	---------	-----	----------	----------	----------	--------	------------

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

Ticket Summaries

1. Please squash a bug!

key	summary	type	created	updated	due	assignee	reporter	priority	status	resolution
-----	---------	------	---------	---------	-----	----------	----------	----------	--------	------------

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

2. Tickets resolved this week:

key	summary	type	created	updated	due	assignee	reporter	priority	status	resolution
-----	---------	------	---------	---------	-----	----------	----------	----------	--------	------------

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

3. Tickets created this week:

key	summary	type	created	updated	due	assignee	reporter	priority	status	resolution
-----	---------	------	---------	---------	-----	----------	----------	----------	--------	------------

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

Minutes

1. LevelDB [corruption issues](#) - potential [fix 4.1.1](#) (fcrepo-webapp-4.1.1-recovery.war)

- Discussion of a couple mailing list issues
 - Consensus on [Andrew Woods](#) proposed resolution of
 - using patch
 - exporting content
 - upgrading through fcrepo versions up to 4.5.1
- Get folks off LevelDB; Make a strong statement
 - Timing is problematic due to Modeshape 5

2. Update on [Versioning Spec](#) - meeting [notes](#)

- Waiting to get things into GitHub repo to proceed, and then into W3C spec format

3. Fedora API GitHub repo(s)

- Which GitHub organization? fcrepo? duraspace?
 - fcrepo - <https://github.com/fcrepo>
- One or many repos?
 - One standard with parts/chapters
- Are the constituent parts of the API versioned separately?
 - Version as a unit

4. Time to deprecate filesystem federation?

- Came from [Esmé Cowles](#), out the D.C. Fedora Users group meeting
- Use webservers that perform better
- Discussion about moving it from core to fcrepo4-exts, or actually deprecating it
- Extract federation out of core base?
 - Yes.
 - Move it to labs
 - Provide community notice, how to move from labs to exts
 - If nobody picks it up after a period of time (to be determined), move it to archives/deprecated
- We need to make a deprecation warning, and a release before we do that
 - "Super-double-down-deprecation-warning-with-blink-tags"

5. Time to n

- Unable to locate Jira server for this macro. It may be due to Application Link configuration.
-
- Provide community notice, how to move from labs to exts
- If nobody picks it up after a period of time (to be determined), move it to archives/deprecated

6. Review of: <https://github.com/fcrepo4/ontology/pull/37>
 - a. This pull request brought up bigger issues about where this should live, and how things are organized
 - b. Move to fcrepo4-exts
 - i. Combine <https://github.com/fcrepo4-exts/fcrepo-indexing-ontology> & <https://github.com/fcrepo4-exts/fcrepo-audit-ontology> into a single fcrepo-exts ontology github repo, but still published as they are
 - ii. Discussion on how versioning will work if they are combined in one github repo
 - c. Merge the pull request
 - d. Needs some cleanup after move (A. Soroka will do it!)
7. [ModeShape5 update](#)
 - a. Carry to next meeting
8. Repository configuration (e.g. repository.json): should this be standardized in any way or do different Fedora implementations use whatever configuration style/content that makes sense for the implementation?
 - a. Carry to next meeting
9. Logging [recommendations](#) and [style-guide](#)
 - a. Carry to next meeting
