

Rich export SPARQL queries

For background on why these queries exist and where they came from, please read about [Rich export](#) and the 2011 [Digital Vita Docs for VIVO](#) mini-grant project.

VIVO's rich export queries are organized by typical sections of a curriculum vitae or CV.

They may be useful to supplement the [examples of SPARQL queries](#) in the [SPARQL Resources](#) section of this wiki.

Child pages

(queries as grouped by directory in the /productMods/WEB-INF/rich-export section of the VIVO source code)

Note that there are 3 additional directories still needing documentation: Presentation, Publication, and Teaching.
