Minutes

- 1. E-Tags
 - a. tamsin johnson moved the discussion up to the LDP Next community on the mailing list. Benjamin Armintor replied, but nothing further.
 - b. A. Soroka: I've been told that this is not surprising, and we may not get a response. This was a blocker for an earlier release candidate, but due to the spec conflict is this really a blocker?
 - c. Esmá Coulos: we should an aboad with the release, and inform clients that they should not use the If Match Header for the time being

d. Unable to locate Jira server for this macro. It may be due to Application Link configuration. : Actually the headers are

n a new ticket (Unable to locate Jira server for this macro. It may be due to Application Link configuration.) to track the is:

2. High Priority ticket

- a. A. Soroka: Unable to locate Jira server for this macro. It may be due to Application Link configuration. is not necessary
 - Unable to locate Jira server for this macro. It may be due to Application Link configuration. : this is not necessarily a ome of FCREPO-2118 could
- c. Unable to locate Jira server for this macro. It may be due to Application Link configuration. : Different options for dealing ion refactoring and a very

experimental branch for relactoring container membership triple generation.

- Fedora Value Propositioning
 a. Go to the link and vote. It is an exercise to see what Fedora stakeholders think are the most important aspects are. Comments go under "Pros & Cons", but the heading is less important and will be reviewed individually.
- 4. Tickets...
 - a. No one has any concerns or needs for the in-flight tickets.
