

# Anticipated Configuration Changes in the DSpace 7 Upgrade

Note, configuration and theme changes that exist in the xmlui or jsui module will need to be re-engineered for the DSpace 7 frameworks.

Where feasible, existing DSpace configuration settings should migrate unchanged. This document enumerates the specific files in dspace/config that will need to be migrated for DSpace 7.

This page is outdated/obsolete. Full list of configuration changes in DSpace 7 are in the Release Notes at [Release Notes#7.0ConfigurationsRemoved](#)

## Assumptions

- Instances that have not yet upgraded to DSpace 6 will need to upgrade configuration files to be compatible with DSpace 6
  - See "Update your DSpace Configurations and/or move them to local.cfg" on the following page: [Upgrading DSpace](#)
- The traditional DSpace workflow will be deprecated and replaced with XML Workflow

## Obsolete or UI-specific configuration files in dspace/config (will need to change)

- modules
  - controlpanel (assumes xmlui)
  - elastic-search
- spring
  - xmlui
- xmlui.xconf

## Anticipated Changes

- modules
  - rest.cfg
- dspace.cfg
  - TODO: more details on what will change here
- item-submission
- news-side, news-top, news-xmlui

## Under Consideration

It is not yet clear if/how the following configuration files might change.

- modules
  - authentication
  - workflow
- input-forms
  - re-use as is or provide automatic migration
- workflow-curation
- workflow

## What should not change

- controlled vocabularies
- crosswalks
- email templates
- modules
  - rdf configs
  - altmetrics
  - bulkedit
  - citation-page
  - clamav
  - curate
  - discovery
  - fetchccdata
  - google-analytics
  - healthcheck
  - oai
  - publication-lookup
  - rdf
  - solr-statistics

- solrauthority
  - spring.cfg
  - submission-curation
  - sword-client
  - sword-server
  - translator
  - usage-statitics
  - versioning
- registries
- spiders
- spring
  - api
- config-definitions
- dc2mods
- default.context
- default.license
- dstat
- dstat.map
- ehcache (from DSpace 6)
- hibernate (from DSpace 6)
- launcher
- local.cfg (from DSpace 6)
- log4j
- sfx
