

Feature Tour - Actions

Each page below describes actions that can be performed for the [Resource](#) at a given current path.

These may include:

Feature Tour - Action - Content

Feature Tour - Action - Content

When viewing a [Resource](#) with [Binary](#) content, click the large green button to download that content. You can also update the description of the binary using the form.

Feature Tour - Action - Create Resource

Feature Tour - Action - Create Resource

From any [Container](#) page, use the "Create New Child Resource" form to create a [Container](#) that will be the child of the current container. From the homepage, the same form can be used to create a new Container.

Feature Tour - Action - Delete

Feature Tour - Action - Delete

You can delete the resource you are currently viewing by clicking the red "Delete" button.

Feature Tour - Action - Update Properties

Feature Tour - Action - Update Properties

When viewing a [Resource](#), you can add or delete properties using the "Update Properties" form.
