2018-02-01 - Fedora Tech Meeting

Time/Place

This meeting is a hybrid teleconference and IRC chat. Anyone is welcome to join...here's the info:

- Time: 11:00am Eastern Daylight Time US (UTC-4)
- Dial-in Number: (712) 775-7035
    - Participant Code: 479307#
    - International numbers: Conference Call Information
    - Web Access: https://www.freeconferencecallhd.com/wp-content/themes/responsive/flashphone/flash-phone.php
- IRC:
    - Join the #fcrepo chat room via Freenode Web IRC (enter a unique nick)
    - Or point your IRC client to #fcrepo on irc.freenode.net

Attendees

- Danny Bernstein
- Andrew Woods blocked URL
- Peter Eichman
- David Wilcox
- Bethany Seeger
- Ben Pennell
- Jared Whiklo
- Yinlin Chen
- Aaron Birkland

Agenda

1. 4.7.5 release testing - discussion of where things stand
2. Sign up for API Alignment sprints by adding your name
3. Pairtree/Appletree options
    a. Proposal (based on group discussion)

    ```
            1. by default, minted identifiers should not have any pairtree structure
    2. by supplying a system property, the current pairtree generation can be restored
    3. retrieving the pairtree nodes should either a) require a second system property or b) not be
    supported at all
    ```

4. External Content: Redirect or Proxy? on fedora-tech

5. [Unable to locate Jira server for this macro. It may be due to Application Link configuration.] - Also move forward with creation-side

6. Compatibility Test Suite
7. ...

Ticket Summaries

1. Please squash a bug!

key	summary	type	created	updated	due	assignee	reporter	priority	status	resolution
Unable to locate Jira server for this macro. It may be due to Application Link configuration.										

2. Tickets resolved this week:

key	summary	type	created	updated	due	assignee	reporter	priority	status	resolution

3. Tickets created this week:

key	summary	type	created	updated	due	assignee	reporter	priority	status	resolution

Minutes

4.7.5 Release

1. Kevin Ford's issue has been resolved - was due to hardcoded config in the release artifact
2. Solr issues have been observed in testing
   - Solr config is set to use autosoftcommit: 1000ms
   - Some custom predicates do not get indexed
   - Likely all is well

- ACTION: Would be great if Aaron Birkland could perform API-X tests
- ACTION: Jared Whiklo to test CLAW
- ACTION: Andrew Woods to add build scripts to testing wiki
- ACTION: Bethany Seeger to do some Vagrant testing
- nt to reduce toolbox retries to 1 -

-
- ACTION: Joshua Westgard to test postgres
- ACTION: Andrew Woods to reach out to Carrick Rogers re:RC testing
- ACTION: Jared Whiklo to help with release on week of the Feb 12th

API Alignment Sprints

1. Please sign-up

Pairtree/Appletree going forward

1. Proposal:
   a. by default, minted identifiers should not have any pairtree structure
   b. by supplying a system property, the current pairtree generation can be restored
   c. retrieving the pairtree nodes should either a) require a second system property or b) not be supported at all
2. Peter Eichman is working on a document specifying behavior of container segmentation
3. There is concern about support for the "pairtree workaround" going into 5.0.0

- ACTION: Danny Bernstein to create a Jira for decisions 1&2

Fcrepo-2520

1. Should we be validating the object of ebucore:hasMimeType?
