more details» copy to my calendar

Attendees

- Mike Conlon
- Christian Hauschke
- Brian Lowe
- Ralph O'Flinn
- Marijane White
- Muhammad Javed

Agenda

1. How/if to meet at the conference
2. Documentation – what do we have, what should we have?
3. Vocabularies and ontologies we should be aligned with? Any/all of OBO, COAR, WikiData, W3C PROV, W3C Time, DataCite, SPAR, CASRAI, EuroCRIS, RDA, others
4. 73 open issues in OpenRIF: How to start, set priorities - https://github.com/openrif/vivo-isf-ontology/issues

Notes

1. Ontologists will meet at lunch time on Wednesday. If you are stying at the hotel there is lunch included and you can go to the Dining Room. From there we will meet in a room to be named. Watch Slack for a note.
2. The group discussed documentation
   a. The primary documentation is in the technical documentation wiki here: Ontology Reference
   b. This is supplemented by tools such as LODE: http://www.essepuntato.it/lode/owlapi/http://vivoweb.org/ontology/core
   c. And the Ontology Explorer https://github.com/vivo-project/ontology-explorer
   d. VoCol looks very good. Christian Hauschke will be presenting at the conference. Mike asked about a subsumption hierarchy display, he has a tool in D3 that is 80% complete. Perhaps this can be added to VoCol.
   e. Additional diagrams can be added to the documentation as needed. (This would be done through the normal JIRA process with review)
3. The group discussed open issues
   a. Which
   b. How would we make changes that require updates to the triple store? By providing CONSTRUCTs that add and remove triples. Brian can show the script that were used in the past (for VIVO 1.5 to VIVO 1.6)
   c. How do we do ontology development? Mike: Through JIRAs and pull requests. We might consider a sub-branch of the develop branch that can be merged back.

In Progress or Review Ontology Issues
